Primate Behavioral Ecology Spring 2013 Book:

Primate Behavioral Ecology Karen B. Strier, 2015-07-22 Primate Behavioral Ecology described as an engaging cutting edge exposition incorporates exciting new discoveries and the most up to date approaches in its introduction to the field and its applications of behavioral ecology to primate conservation This unique comprehensive single authored text integrates the basics of evolutionary ecological and demographic perspectives with contemporary noninvasive molecular and hormonal techniques to understand how different primates behave and the significance of these insights for primate conservation Examples are drawn from the classic primate field studies and more recent studies on previously neglected species from across the primate order illustrating the vast behavioral variation that we now know exists and the gaps in our knowledge that future studies will fill

Primate Ecology and Conservation Eleanor Sterling, Nora Bynum, Mary Blair, 2013-04-04 This practical volume brings together a group of distinguished primate researchers to synthesise field laboratory and conservation management techniques for primate ecology and conservation

The Behavioral Ecology of the Tibetan Macaque Jin-Hua Li, Lixing Sun, Peter M. Kappeler, 2019-11-18 This open access book summarizes the multi disciplinary results of one of China's main primatological research projects on the endemic Tibetan macaque *Macaca thibetana* which had continued for over 30 years but which had never been reported on systematically Dedicated to this exceptional Old World monkey this book makes the work of Chinese primatologists on the social behavior cooperation culture cognition group dynamics and emerging technologies in primate research accessible to the international scientific community One of the most impressive Asian monkeys and the largest member of its genus the Tibetan macaque deserves to be better known This volume goes a long way towards bringing this species into the spotlight with many excellent behavioral analyses from the field Frans de Waal Professor of Psychology Emory University USA Macaques matter To understand primate patterns and trends and to gain important insight into humanity we need to augment and expand our engagement with the most successful and widespread primate genus aside from *Homo* This volume focuses on the Tibetan macaque a fascinating species with much to tell us about social behavior physiology complexity and the macaque knack for interfacing with humans This book is doubly important for primatology in that beyond containing core information on this macaque species it also reflects an effective integrated collaboration between Chinese scholars and a range of international colleagues exactly the type of collaborative engagement primatology needs This volume is a critical contribution to a global primatology Agust n Fuentes Professor of Anthropology University of Notre Dame USA I have many fond memories of my association with Mt Huangshan research beginning in 1983 when together with Professor Qishan Wang we established this site It is such a beautiful place and I miss it It is gratifying to see how far research has progressed since we began work there becoming more internationalized and very much a collaborative endeavor under the long term direction of Professor Jin Hua Li and colleagues This book highlights the increased interest in this species representing a variety of disciplines ranging from macro

aspects of behavior cognition and sociality to micro aspects of microbes parasites and disease authored by a group of renowned Chinese and international primatologists I applaud their efforts and expect more interesting work to come from this site in the years ahead Kazuo Wada Professor Emeritus Kyoto University Japan

The Cultural Lives of Whales and Dolphins Hal Whitehead, Luke Rendell, 2022-12-22 An astonishing unconstrained exploration of the nature and practice of cetacean culture a revolutionary book Philip Hoare author of *The Whale* In the songs and bubble feeding of humpback whales in young killer whales learning to knock a seal from an ice floe in the same way their mother does and in the use of sea sponges by the dolphins of Shark Bay Australia to protect their beaks while foraging for fish we find clear examples of the transmission of information among cetaceans Just as human cultures pass on languages and turns of phrase tastes in food and in how it is acquired and modes of dress could whales and dolphins have developed a culture of their very own Unequivocally yes In *The Cultural Lives of Whales and Dolphins* cetacean biologists Hal Whitehead who has spent much of his life on the ocean trying to understand whales and Luke Rendell whose research focuses on the evolution of social learning open an astounding porthole onto the fascinating culture beneath the waves As Whitehead and Rendell show cetacean culture and its transmission are shaped by a blend of adaptations innate sociality and the unique environment in which whales and dolphins live Drawing on their own research as well as a scientific literature as immense as the sea including evolutionary biology animal behavior ecology anthropology psychology and neuroscience Whitehead and Rendell dive into realms both humbling and enlightening as they seek to define what cetacean culture is why it exists and what it means for the future of whales and dolphins And ultimately what it means for our future as well

Why Sex Matters Bobbi S. Low, 2015-01-04 Why are men like other primate males usually the aggressors and risk takers Why do women typically have fewer sexual partners In *Why Sex Matters* Bobbi Low ranges from ancient Rome to modern America from the Amazon to the Arctic and from single celled organisms to international politics to show that these and many other questions about human behavior largely come down to evolution and sex More precisely as she shows in this uniquely comprehensive and accessible survey of behavioral and evolutionary ecology they come down to the basic principle that all organisms evolved to maximize their reproductive success and seek resources to do so but that sometimes cooperation and collaboration are the most effective ways to succeed This newly revised edition has been thoroughly updated to include the latest research and reflect exciting changes in the field including how our evolutionary past continues to affect our ecological present

The Oxford Handbook of Infidelity Tara DeLecce, Todd K. Shackelford, 2022 This handbook showcases a broad range of infidelity topics through perspectives in social psychology evolutionary psychology and other areas of research on romantic relationships It discusses the processes of infidelity alongside sources of variation such as sexual orientation developmental life history individual differences and culture for the broader social scientific community interested in fidelity in romantic relationships

Primate Visions Donna J. Haraway, 2013-01-11 Haraway's discussions of how scientists have perceived the sexual

nature of female primates opens a new chapter in feminist theory raising unsettling questions about models of the family and of heterosexuality in primate research

Social Physics Alex Pentland, 2015-01-27 From one of the world's leading data scientists a landmark tour of the new science of idea flow offering revolutionary insights into the mysteries of collective intelligence and social influence If the Big Data revolution has a presiding genius it is MIT's Alex Sandy Pentland Over years of groundbreaking experiments he has distilled remarkable discoveries significant enough to become the bedrock of a whole new scientific field social physics Humans have more in common with bees than we like to admit We're social creatures first and foremost Our most important habits of action and most basic notions of common sense are wired into us through our coordination in social groups Social physics is about idea flow the way human social networks spread ideas and transform those ideas into behaviors Thanks to the millions of digital bread crumbs people leave behind via smartphones GPS devices and the Internet the amount of new information we have about human activity is truly profound Until now sociologists have depended on limited data sets and surveys that tell us how people say they think and behave rather than what they actually do As a result we've been stuck with the same stale social structures classes markets and a focus on individual actors data snapshots and steady states Pentland shows that in fact humans respond much more powerfully to social incentives that involve rewarding others and strengthening the ties that bind than incentives that involve only their own economic self interest Pentland and his teams have found that they can study patterns of information exchange in a social network without any knowledge of the actual content of the information and predict with stunning accuracy how productive and effective that network is whether it's a business or an entire city We can maximize a group's collective intelligence to improve performance and use social incentives to create new organizations and guide them through disruptive change in a way that maximizes the good At every level of interaction from small groups to large cities social networks can be tuned to increase exploration and engagement thus vastly improving idea flow Social Physics will change the way we think about how we learn and how our social groups work and can be made to work better at every level of society Pentland leads readers to the edge of the most important revolution in the study of social behavior in a generation an entirely new way to look at life itself

Chimpanzees and Human Evolution Martin N. Muller, Richard W. Wrangham, David R. Pilbeam, 2017-11-27 Knowledge of wild chimpanzees has expanded dramatically This volume edited by Martin Muller Richard Wrangham and David Pilbeam brings together scientists who are leading a revolution to discover and explain human uniqueness by studying our closest living relatives Their conclusions may transform our understanding of human evolution

Biological Measures of Human Experience across the Lifespan Lynnette Leidy Sievert, Daniel E. Brown, 2016-12-21 This volume explores methods used by social scientists and human biologists to understand fundamental aspects of human experience It is organized by stages of the human lifespan beginnings adulthood and aging Explored are particular kinds of experiences including pain stress activity levels sleep quality memory and menopausal hot flashes that have traditionally relied upon self reports but are subject to inter individual

differences in self awareness or culture based expectations The volume also examines other ways in which normally invisible phenomena can be made visible such as the caloric content of foods blood pressure fecundity growth nutritional status genotypes and bone health All of the chapters in this book address the means by which social scientists and human biologists measure subjective and objective experience **Stone Tools in Human Evolution** John J. Shea, 2017 An exploration of how the evolution of behavioral differences between humans and other primates affected the archaeological stone tool evidence

Natural Neuroscience Nachum Ulanovsky, 2025-04-15 A new approach to brain research that emphasizes studying the brain under naturalistic conditions Natural neuroscience departs from the classical reductionist approach which emphasizes control at the expense of natural behaviors by proposing a shift toward real world relevance natural behaviors and ecological validity In Natural Neuroscience Nachum Ulanovsky presents the conceptual empirical and technological underpinnings that enabled this new field Natural neuroscience researchers posit that when studying any brain region in any animal whether standard mammalian species such as rodents and primates or nonstandard species it is crucial to pursue the animal's natural behaviors and to consider the natural problems it needs to solve By preventing rich natural behaviors says Ulanovsky we miss key aspects of brain function and we may not even know what we miss The author surveys recent studies that have begun to move in this direction across multiple subfields of neuroscience including sensory cognitive social and behavioral neuroscience He discusses technological advances that are allowing the pursuit of more naturalistic experiments including methods for recording neural activity in freely behaving freely moving animals e g wired and wireless electrophysiology and imaging methods for manipulating neural activity in freely moving animals e g wired and wireless optogenetics and methods for quantifying the details of behavior He makes connections across the four major scientific disciplines that focus on understanding behavior neuroscience behavioral ecology ethology and psychology bringing them closer together and closer to real life *Duetting and Turn-Taking Patterns of Singing Mammals: From Genes to Vocal Plasticity, and Beyond* Patrice Adret, Dena Jane Clink, Charles T. Snowdon, Sofya Dolotovskaya, 2023-10-23 Mammalian vocal duets and turn taking exchanges long coordinated acoustic signals exchanged between two individuals are primarily found in family living pair bonded mammals with a socially monogamous lifestyle some rodents some lemurs tarsiers titi monkeys a Mentawai langur gibbons and siamangs Duetting and turn taking patterns combine visual chemical tactile and auditory cues to produce some of the most exuberant displays in the realm of animal communication How and why such phenotypes evolved independently across main lineages are fundamental questions at the core of the nature nurture debate Duetting styles ranging from antiphonal non overlapping to simultaneous overlapping emissions have now been documented in various taxa some of which are quite reminiscent of turn taking rules in human conversation Nonetheless much remains to be learned about this complex motor skill and at all four levels of analysis namely 1 developmental processes 2 causal mechanisms 3 functional properties and 4 evolutionary history Given the strong link between this form of coordinated singing and pair bonding gaining a deeper

understanding of this kind of cooperative behavior will likely shed more light on the deep evolutionary roots of human culture language and music *Killing, Capture, Trade and Ape Conservation* Arcus Foundation,2021-04-29 An objective analysis of relevant issues and case studies to further the ape conservation agenda around killing capture and trade **Mammalogy** George A. Feldhamer,Joseph F. Merritt,Carey Krajewski,Janet L. Rachlow,Kelley M. Stewart,2020-03-24 A completely revised and updated edition of the leading mammalogy textbook featuring color photographs throughout and a new streamlined structure for enhanced use in courses There are more than 6 400 species in the class Mammalia including the blue whale the largest animal that has ever lived and the pygmy shrew which weighs little more than a dime Such diversity among mammals has allowed them to play critical roles in every ecosystem whether marine freshwater alpine tundra forest or desert Reflecting the expertise and perspective of five leading mammalogists the fifth edition of *Mammalogy* Adaptation Diversity Ecology significantly updates taxonomy adds a new introductory chapter on the science of mammalogy and highlights several recently described species To enhance its appeal to students textual material has been reduced consolidated and streamlined without sacrificing breadth or depth of coverage The fifth edition includes for the first time stunning color photographs throughout chapters rearranged and grouped to best reflect phylogenetic relationships with updated numbers of genera and species for each family updated mammalian structural and functional adaptations as well as ordinal fossil histories recent advances in mammalian phylogeny biogeography social behavior and ecology with 12 new or revised cladograms reflecting current research findings new breakout boxes on novel or unique aspects of mammals new work on female post copulatory mate choice cooperative behaviors group defense and the role of the vomeronasal system discussions of the current implications of climate change and other anthropogenic factors for mammals Maintaining the accessible readable style for which Feldhamer and his coauthors are well known this new edition of *Mammalogy* is the authoritative textbook on this amazingly diverse class of vertebrates **Intertwined** Rebecca Kormos,2024-04-30 Winner of the Studs and Ida Terkel Prize A powerful argument that greater inclusion of women in conservation and climate science is key to the future of the planet Women are disproportionately impacted by climate change floods droughts and extreme temperatures overwhelmingly affect women in the short and long term In some cases women make up almost 90 percent of casualties during dangerous climate events and the majority of those displaced in the aftermath are women Despite this disparity women are underrepresented at every level of decision making about the future of our planet only 24 percent of CEOs in nonprofit conservation and around one third of the representatives in national and global climate negotiating bodies have been women In *Intertwined* writer and wildlife biologist Rebecca Kormos elevates the voices of women working to prevent the climate crisis weaving together their stories to make a powerful case for why women are essential to changing our current trajectory toward catastrophic global warming and environmental degradation Kormos argues that empowering women is one of the most important solutions to climate change and biodiversity loss women s leadership and equal representation is linked to

lower CO2 emissions better forest management better land protection less land grabbing and fewer conflicts over resources For readers of All We Can Save and Braiding Sweetgrass Kormos joins the ranks of recent breakthrough efforts to showcase women s voices in the movement to combat climate change Kormos takes this endeavor one step further with a global intersectional narrative of how women and gender nonconforming individuals are doing the crucial work at the local and national levels to reframe how we think about environmental activism Ultimately Intertwined proves that climate justice is inextricable from gender equality
