Managing Aviation Projects from Concept to Completion Triant G. Flouris, Dennis Lock, 2016-02-22 Triant Flouris is a prominent academic and administrator in aviation management education Dennis Lock has more than forty years experience in practising lecturing and writing about project management When these two experts combined their considerable talents to write their earlier book Aviation Project Management it was little wonder that distinguished reviewers gave generous praise and acclaimed it as a welcome addition to what until then had been a neglected field That first title was structured as an essential primer for managers and students The authors have now written this more in depth book for managers and students who need to study aviation project management in much greater detail as well as critically connect project management within an aviation context to prudent business decision making Aviation project management is described in considerable detail throughout all stages of a lifecycle that begins when the project is only a vague concept and does not end until the project has been successfully completed fully documented and put into operational service Aviation projects have commonly failed to deliver their expected outcomes on time and have greatly exceeded their intended budgets Many of those failures would have been prevented if the project managers had adhered to the sound principles of project management as described and demonstrated throughout this book

Managing and Modelling Complex Projects T.M. Williams, 2013-12-20 Projects are becoming more complex and traditional project management is proving inadequate The key papers in this volume which takes a look at a variety of new approaches have been written by 13 leading figures and are discussed by 54 invited academics consultants contractors and clients from 15 countries The papers cover modelling techniques extensions to PERT methods risk analysis and system dynamics particular domains new technology software development and infrastructure projects specifically human factors corporate structures

from both Western and Eastern European perspectives management techniques Western and Eastern and the management of portfolios of projects The book adopts a wide view rather than advocating one technique the mix of authors provides a rich heterogeneous perspective Mathematical modelling is balanced with human management and over complex of simplistic techniques are avoided Readers are assumed already to have a sound knowledge of project management
