F. GLOBAL & PROJECT CALENDARS

You can create and assign calendars to each resource and each activity. These calendars define the available work hours in each calendar day. You can also specify national holidays, your organization's holidays, project-specific work/non-work days, and resource vacation days. Calendar assignments are used for activity scheduling, tracking, and resource leveling. Whether an activity uses its assigned calendar or the calendar of an assigned resource depends on the activity type you specify.

Three calendar pools are defined: **Global**, **Resource**, and **Project**. The global calendar pool contains calendars that apply to all projects. The project calendar pool is a separate pool of calendars for each project. The resource calendar pool can be a separate pool of calendars for each resource. You can assign either resource or global calendars to resources, and you can assign either global or project calendars to activities.

You can link resource and project calendars to global calendars. Then, if you make changes to a global calendar, your changes apply to all resource and project calendars that are linked to the modified global calendar.
