Princeton Instruments Pixis Manual:

Accurate Calibration of Raman Systems Magnus Schlösser, 2014-05-05 Neutrinos can arguably be labeled as the most fascinating elementary particles known as their small but non zero rest mass points to new mass generating mechanisms beyond the Standard Model and also assigns primordial neutrinos from the Big Bang a distinct role in shaping the evolution of large scale structures in the universe The open question of the absolute neutrino mass scale will be addressed by the Karlsruhe Tritium Neutrino KATRIN experiment currently under construction This thesis reports major contributions to developing and implementing new laser spectroscopic precision tools to continuously monitor the isotope content of the windowless gaseous tritium source of KATRIN The method of choice Raman spectroscopy is ideally suited for in situ monitoring of all six hydrogen isotopologues In a series of beautiful experiments the author obtained two independent novel calibration methods first based on a comparison of experimental Raman depolarization ratios with corresponding quantum chemical calculations and second on a gas sampling technique Both methods yield consistent cross calibration results and as well as yielding improvements in precision will be of major importance in reducing systematic effects in long term neutrino mass measurements The methods developed in this thesis also have great potential to further broaden the applications of Raman spectroscopy to study extended sources such as in atmospheric physics **Advances in Biomedical Photonics and Imaging** Qingming Luo, 2008 This unique volume contains selected papers presented at the 6th International Conference on Photonics and Imaging in Biology and Medicine PIBM 2007 held on November 4 6 2007 at Wuhan National Laboratory for Optoelectronics Huazhong University of Science and Technology Wuhan P R China PIBM is designed to bring together scientists engineers and clinical researchers from a variety of disciplines engaged in applying optical science photonics and imaging technologies to problems in biology and medicine The scope of this conference ranges from basic research to instrumentation engineering to biological and clinical studies It is recognized as one of the largest and most comprehensive international conferences in China and represents the highest level of worldwide research in this field An increasing number of young researchers are presenting and exchanging their innovative ideas on this friendly and professional platform thus making PIBM a not to be missed annual meeting in Wuhan **Laser Focus World** ,2004 Global electro optic technology and markets Photonics technologies solutions for technical professionals worldwide *Proceedings of the National Academy of Sciences of the United States of America* National Academy of Sciences (U.S.), 2006 **The Etude** ,1900 **The Instrument Manual**, 1949 **INSTRUMENT MANUAL**.,1949 *Manual of the Principal Instruments Used in American Engineering and Surveying, Manufactured by W. and L.
