Frank and Bernanke *Macroeconomics* Second Canadian Edition addresses these needs by focusing on the following: Active learning approach. New concepts are introduced by means of simple examples, usually numerical, which are developed step by step in the text. This system also includes exercises similar to the worked examples for students to practice on. Solutions to the Exercises are found at the end of each chapter. Economics reflect the real world. Through the Economic Naturalist feature, minicases, students are encouraged to become economic naturalists who employ basic economic principles to understand and explain what they see around them. These examples show students the relevance of economics to their world. Core concepts are reinforced in the discussion of each of these minicases. Additional Economic Naturalist examples are found on the Student web page and in the Instructor's Manual. Core Principles.
