With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere. However, there is information, and then there is correct, appropriate, and timely information. While we might love being able to turn to Wikipedia for encyclopedia-like information or search Google for the thousands of links, **Civil Engineering Problems and Solutions** by Donald G. Newnan, 2003-09-18, written by 6 professors each with a Ph.D. in Civil Engineering, is a detailed description of the examination and suggestions on how to prepare for it. It contains 195 exam essays and multiple choice problems with a total of 510 individual questions. A complete 24 problem sample exam and a detailed step-by-step solution for every problem in the book. This book may be used as a separate stand-alone volume or in conjunction with *Civil Engineering License Review*, 14th Edition, 0 79318 546 7. Its chapter topics match those of the License Review book. All of the problems have been reproduced for each chapter, followed by detailed step-by-step solutions. Similarly, the 24 problem sample exam, 12 essays, and 12 multiple choice problems are given, followed by step-by-step solutions to the exam. Engineers looking for a CE/PE review with problems and solutions will buy both books. Those who want only an elaborate set of exam problems, a sample exam, and detailed solutions to every problem will purchase this book. 100% problems and solutions.

*Geotechnical Engineering Handbook* Braja M. Das, 2011. The *Geotechnical Engineering Handbook* brings together essential information related to the evaluation of engineering properties of soils, design of foundations such as spread footings, mat foundations, piles, and drilled shafts, and fundamental principles of analyzing the stability of slopes and embankments, retaining walls, and other earth retaining structures. The Handbook also covers soil dynamics and foundation vibration to analyze the behavior of foundations subjected to cyclic vertical sliding and rocking excitations. Topics addressed in some detail include environmental geotechnology and foundations for railroad beds.
