High Courts in Global Perspective Nuno Garoupa, Rebecca D. Gill, Lydia B. Tiede, 2021-08-27 High courts around the world hold a revered place in the legal hierarchy These courts are the presumed impartial final arbiters as individuals institutions and nations resolve their legal differences But they also buttress and mitigate the influence of other political actors protect minority rights and set directions for policy The comparative empirical analysis offered in this volume highlights important differences between constitutional courts but also clarifies the unity of procedure process and practice in the world s highest judicial institutions High Courts in Global Perspective pulls back the curtain on the interlocutors of court systems internationally This book creates a framework for a comparative analysis that weaves together a collective narrative on high court behavior and the scholarship needed for a deeper understanding of cross national contexts From the U S federal courts to the constitutional courts of Africa from the high courts in Latin America to the Court of Justice of the European Union high courts perform different functions in different societies and the contributors take us through particularities of regulation and legislative review as well as considering the legitimacy of the court to serve as an honest broker in times of political

transition Unique in its focus and groundbreaking in its access this comparative study will help scholars better understand the roles that constitutional courts and judges play in deciding some of the most divisive issues facing societies across the globe From Africa to Europe to Australia and continents and nations in between we get an insider's look into the construction and workings of the world's courts while also receiving an object lesson on best practices in comparative quantitative scholarship today Contributors Aylin Aydin Cakir Yeditepe University Turkey Tanya Bagashka University of Houston Clifford Carrubba Emory University Amanda Driscoll Florida State University Joshua Fischman University of Virginia Joshua Fjelstul Washington University in St Louis Tom Ginsburg University of Chicago Melinda Gann Hall Michigan State University Chris Hanretty University of London Lori Hausegger Boise State University Diana Kapiszewski Georgetown University Lewis A Kornhauser New York University Dominique H Lewis Texas A M University Chien Chih Lin Academia Sinica Taiwan Sunita Parikh Washington University in St Louis Russell Smyth Monash University Australia Christopher Zorn Pennsylvania State University Constitutionalism and Democracy Comparing autocracies in the early Twenty-first Century Aurel Croissant, Steffen Kailitz, Patrick Koellner, Stefan Wurster, 2016-03-17 Authoritarianism research has evolved into one of the fastest growing research fields in comparative politics The newly awakened interest in autocratic regimes goes hand in hand with a lack of systematic research on the results of the political and substantive policy performance of variants of autocratic regimes The contributions in this second volume of Comparing Autocracies are united by the assumption that the performance of political regimes and their persistence are related Furthermore autocratic institutions and the specific configurations of elite actors within authoritarian regime coalitions induce dictators to undertake certain policies and that different authoritarian institutions are therefore an important piece of the puzzle of government performance in dictatorships Based on these two prepositions the contributions explore the differences between autocracies and democracies as well as between different forms of non democratic regimes in regard to their outcome performance in selected policy fields how political institutions affect autocratic performance and persistence whether policy performance matter for the persistence of authoritarian rule and what happens to dictators once autocratic regimes fall This book is an amalgam of articles from the journals Democratization Contemporary Politics and Politische Vierteljahresschrift **A Model Discipline** Kevin A. Clarke, David M. Primo, 2012-02-16 In A Model Discipline Kevin A Clarke and David M Primo turn a critical eye to the methodological approach that dominates modern political science Clarke and Primo contend that the field's emphasis on model testing has led to a distortion of both the modeling process and the art of data analysis and cannot be logically justified The authors argue that models should be seen as objects and thus regarded as neither true nor false Models should instead be evaluated for their usefulness for a particular purpose Divided into two parts the book first establishes that current practice is not philosophy free and rests on a number of questionable assumptions The second part focuses on the different ways that theoretical and statistical models can be useful and closes with a defensible justification for integrating theoretical

and statistical models A novel work of methodology A Model Discipline offers a new perspective on long held assumptions about the way research in the social sciences should be conducted **Empirical Research and Writing** Leanne C.

Powner,2014-11-04 Students can easily misstep when they first begin to do research Leanne C Powner s new title Empirical Research and Writing A Student s Practical Guide provides valuable advice and guidance on conducting and writing about empirical research Chapter by chapter students are guided through the key steps in the research process Written in a lively and engaging manner and with a dose of humor this practical text shows students exactly how to choose a research topic conduct a literature review make research design decisions collect and analyze data and then write up and present the results The book s approachable style and just in time information delivery make it a text students will want to read and its wide ranging and surprisingly sophisticated coverage will make it an important resource for their later coursework

Chaos, Violence, Dynasty Eric M. McGlinchey,2011-09-30 In the post Soviet era democracy has made little progress in Central Asia In Chaos Violence Dynasty Eric McGlinchey presents a compelling comparative study of the divergent political courses taken by Kyrgyzstan Uzbekistan and Kazakhstan in the wake of Soviet rule McGlinchey examines economics religion political legacies foreign investment and the ethnicity of these countries to evaluate the relative success of political structures in each nation McGlinchey explains the impact of Soviet policy on the region from Lenin to Gorbachev Ruling from a distance a minimally invasive system of patronage proved the most successful over time but planted the seeds for current neo patrimonial governments The level of direct Soviet involvement during perestroika was the major determinant in the stability of ensuing governments Soviet manipulations of the politics of Uzbekistan and Kazakhstan in the late 1980s solidified the role of elites while in Kyrgyzstan the Soviets looked away as leadership crumbled during the ethnic riots of 1990 Today Kyrgyzstan is the poorest and most politically unstable country in the region thanks to a small corrupt and fractured political elite In Uzbekistan Islam Karimov maintains power through the brutal suppression of disaffected Muslims who are nevertheless rising in numbers and influence In Kazakhstan a political machine fueled by oil wealth and patronage underlies the greatest economic equity in the region and far less political violence McGlinchey s timely study calls for a more realistic and flexible view of the successful aspects of authoritarian systems in the region that will be needed if there is to be any potential benefit from foreign engagement with the nations of Central Asia and similar political systems globally The

Kurds and the Politics of Turkey Deniz Çifçi,2019-08-08 The Kurds constitute the largest stateless nation in the world Their position in Turkey attracts attention both within the country and internationally particularly focusing on the demand for Kurdish independence Yet since the 1990s new Kurdish parties have formed within Turkey who have a variety of ideologies and demands that go beyond and differ in opinion on the question of independence Much of the present literature on the topic looks at the Kurds of Turkey as a homogenous group with unified political demands which over simplifies their position within the political backdrop of Turkey This book seeks to provide nuance and depth to the current debate on Kurdish

political agency and presence in Turkey Presently the Kurds political demands can be classified into four categories democratic autonomy their cultural rights to be granted federalism territorial autonomies and independence creation of a Kurdish nation state In a broad sense these models can also be ordered into two categories territorial political models federalism and independence and non territorial political models democratic autonomy and cultural rights Considering the diversity within the Kurdish community intertwinement of tribal ethnic and national identity and differences in their language religion and ideology there are several contributing factors for the emergence of the current varied political demands of Kurds By explaining variation among the Kurds political demands through close analysis of existing at emerging parties this study challenges a deterministic approach to the Kurds which currently dominates the discourse Foreign Pressure and the Politics of Autocratic Survival Abel Escribà-Folch, Joseph Wright, 2015-09-17 Can coercive foreign policy destabilize autocratic regimes Can democracy be promoted from abroad This book examines how foreign policy tools such as aid economic sanctions human rights shaming and prosecutions and military intervention influence the survival of autocratic regimes Foreign pressure destabilizes autocracies through three mechanisms limiting the regime s capacity to maintain support undermining its repressive capacity and altering the expected utility of stepping down for political elites Foreign Pressure and the Politics of Autocratic Survival distinguishes between three types of autocracies personalist rule party based regimes and military dictatorships These distinct institutional settings influence the dictators strategies for surviving in power as well as the propensity with which their leaders are punished after a regime transition Consequently the influence of foreign pressure varies across autocratic regime types Further the authors show that when foreign coercion destabilizes an autocracy this does not always lead to democratic regime change because different regimes breakdown in distinct ways While democratization is often equated with the demise of autocratic rule it is just one possible outcome after an autocratic regime collapses Many times instead of democratization externally induced regime collapse means that a new dictatorship replaces the old one This theory is tested against an extensive analysis of all dictatorships since 1946 and historical cases which trace the causal process in instances where foreign policy tools helped oust dictatorships Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford Economic Geography, Electoral Institutions, and the Politics of Redistribution Stephanie J. Rickard, 2018-04-19 Explores how political institutions and economic geography interact to shape governments policy decisions particularly with respect to subsidies **Revisiting the Arab Uprisings** Stéphane Lacroix, Jean-Pierre Filiu, 2018-12-15 Since 2013 the Middle East has experienced a double trend of chaos and civil war on the one hand and the return of authoritarianism on the

other That convergence has eclipsed the political transitions that occurred in the countries whose regimes were toppled in 2011 as if they were merely footnotes to a narrative that naturally led from an Arab Spring to an Arab Winter This volume aims at rehabilitating those transitions by considering them as expressions of a revolutionary moment whose outcome was never pre determined but depended on the choices of a large range of actors It brings together leading scholars of Arab politics to adopt a comparative approach to a few crucial aspects of those transitions constitutional debates the question of transitional justice the evolution of civil military relations and the role of specific actors both domestic and international

The Senate and the People of Canada James T. McHugh, 2017-09-20 The Senate of Canada is the upper house of its parliamentary system It is an appointed legislative chamber that has been frequently derided for its apparent lack of effective activity its failure to represent Canada's federal system and the perceived lack of accountability among its members Reform of the Senate persists as one of the most contentious issues in the country Typical reform proposals begin with the assumption that it must become an elected body that primarily represents Canada's provinces and can serve as an effective check on the federal government and the House of Commons This book challenges those assumptions through a thorough analysis that places the Senate within the context of other parliamentary upper houses It presents a hypothetical constitutional amendment and a proposal for non constitutional reform that are based upon alternative models derived from that broader context The book ultimately recommends a Senate that remains unelected but with a more expansive appointment process that more appropriately reflects the optimal role of a parliamentary upper house as well as the diversity regional aspirations and political principles of Canadian democracy
