Union Law Catherine Barnard, Okeoghene Odudu, 2009-03-05 A commonly expressed view is that the citizens and the Member States are destined to be overcome by the European Union. There is a sense that the Union of today is not what was intended to be created or acceded to by the Member States or its citizens. The *Outer Limits of European Union Law* brings together a diverse group of legal scholars to consider aspects of EU substantive constitutional and procedural law in a manner highlighting the many senses in which the European Union is or can be limited and so demonstrating that the fear of being overcome is largely a false fear. By exploring the mechanisms and devices used to limit the European Union, the contributors also reveal not only the strengths of the various limits but also and more crucially the weakness of the limits, thereby demonstrating that the prospect of being overcome may be a genuine risk to be guarded against. By considering general themes eg legitimacy and core subject areas eg policing free movement of goods, remedies, the book reveals the various techniques used by the Court of Justice, Community institutions and Member States to define and modify the outer limits of the European Union and European Union Law.

International Handbook on Teaching and Learning Economics Gail Mitchell Hoyt, KimMarie McGoldrick, 2012

The *International Handbook on Teaching and Learning Economics* is a power-packed resource for anyone interested in investing time into the effective improvement of their personal teaching methods and for those who desire to teach students how to think like an economist. It sets guidelines for the successful integration of economics into a wide variety of traditional and non-traditional settings in college and graduate courses, with some attention paid to primary and secondary classrooms. The *International Handbook on Teaching and Learning Economics* is highly recommended for all economics instructors and individuals supporting economic education in courses in and outside of the major. This Handbook provides a multitude of rich resources that make it easy for new and veteran instructors to improve their instruction in ways promising to excite an increasing number of students about learning economics. This Handbook should be on every instructor's desk and referenced regularly.

Tawni Hunt Ferrarini, *The American Economist*. In delightfully readable short chapters by leaders in the sub-fields who are also committed teachers, this encyclopedia of how and what in teaching economics covers everything. There is nothing else like it, and it should be required reading for anyone starting a teaching career and for anyone who has been teaching for fewer than 50 years.

Capitalism John E. Ikerd,2005 Addresses the philosophical and scientific roots of sustainability Examines neglected ethical and moral aspects of capitalist economic theory Advocates a new sustainable paradigm for all living organizations businesses economics and societies Over the past half century capitalist economics has deviated from its original social purpose into an amoral quest for economic growth at any cost A relentless pursuit of profits and the bottom line poses a constant threat to the earth and the life upon it Ikerd who spent the first half of his thirty year academic career as a traditional free market neoclassical economist came to see the inherently extractive and exploitative nature of his own field and began to develop an alternative vision for capitalism which he lays out in this book In order to foster a new economics of sustainability social and ethical values must be reintegrated into capitalist economics thus restoring a sense of balance into the economic system that ensures that communities the world over will thrive Rather than calling for the overthrow of capitalism Ikerd suggests how capitalism can become a vehicle for these ends Both a penetrating critique of capitalism and an exploration of its vast and untapped potential for maximizing human welfare Sustainable Capitalism A Matter of Common Sense is written for those concerned with the future of our planet and the continued viability of global capitalism
