Excellent Teaching Bettina Jansen-Schulz, Till Tantau, 2018-10-12 Die Frage wie die Lehre an Hochschulen zu Exzellenz verbessert werden kann beantworten die Autorinnen und Autoren des Sammelbands aus vier Perspektiven Sie betrachten Herausforderungen für die Steuerung der Organisation Hochschule und diskutieren aktuelle Forschungsentwicklungen insbesondere anhand der Methode Scholarship of Teaching and Learning Außerdem werden gute Beispiele aus der Lehrpraxis präsentiert und Ansätze vorgestellt um exzellente Lehre sichtbar zu machen Der Band richtet sich an Akteurinnen und Akteure aus der Lehr- und Hochschulentwicklung Big Data, Algorithms and Food Safety Salvatore Sapienza, 2022-10-20 This book identifies the principles that should be applied when processing Big Data in the context of food safety risk assessments Food safety is a critical goal in the protection of individuals' right to health and the flourishing of the food and feed market Big Data is fostering new applications capable of enhancing the accuracy of food safety risk assessments An extraordinary amount of information is analysed to detect the existence or predict the likelihood of future risks also by means of machine learning algorithms Big Data and novel analysis techniques are topics of growing interest for food safety agencies including the European Food Safety Authority EFSA This wealth of information brings with it both opportunities and risks concerning the extraction of meaningful inferences from data However conflicting interests and tensions among the parties involved are hindering efforts to find shared methods for steering the processing of Big Data in a sound transparent and trustworthy way While consumers call for more transparency food business operators tend to be reluctant to share informational assets This has resulted in a considerable lack of trust in the EU food safety system A recent legislative reform supported by new legal cases aims to restore confidence in the risk analysis system by reshaping the meaning of data ownership in this domain While this regulatory approach is being established breakthrough analytics techniques are encouraging thinking about the next steps in managing food safety data in the age of machine learning The book focuses on two core topics data ownership and data governance by evaluating how the regulatory framework addresses the challenges raised by Big Data and its analysis in an applied significant and overlooked domain To do so it adopts an interdisciplinary approach that considers both the technological advances and the policy tools adopted in the European Union while also assuming an ethical perspective when exploring potential solutions The conclusion puts forward a proposal an ethical blueprint for identifying the principles Security Accountability Fairness Explainability Transparency and Privacy to be observed when processing Big Data for food safety purposes including by means of machine learning Possible implementations are then discussed also in connection with two recent legislative proposals namely the Data Governance Act and the Artificial Intelligence Act Putting science and engineering at the heart of government policy Great Britain: Parliament: House of Commons: Innovation, Universities, Science and Skills Committee, 2009-07-23 A report that considers the broad issue of why science and engineering are important and why they should be at the heart of Government policy It

also considers three more specific issues the debate on strategic priorities the principles that inform science funding decisions and the scrutiny of science and engineering across Government

Decentralisation and Regional Development Eva Dick,Karin Gaesing,Daniel Inkoom,Teodoro Kausel,2016-06-15 This book analyzes decentralisation regional development paths and success factors in different governance sectors in Ghana the Philippines Tanzania and Chile and discuss overarching aspects of relevance Decentralisation which refers to the delegation of administrative responsibilities political decision making and fiscal powers to lower levels of government is now considered one of the most efficient engines of development In Sub Saharan Africa decentralised states have made more progress in reducing poverty than those states with lower decentralisation scores But in many countries decentralisation is still considered a work in progress with unsatisfactory results From a spatial point of view the link between decentralisation and regional and district development is particularly interesting Both in the North and in the South regional or district development is seen as holding the potential for advancing social and economic development and even more so in decentralised political settings Space based networks at the regional or district level are considered instrumental for responding to locally specific challenges e g in areas lagging behind economically

Social Justice Loretta Capeheart,Dragan Milovanovic,2020-05-15 An eye for an eye the balance of the scales for centuries these and other traditional concepts exemplified the public s perception of justice Today popular culture including television shows like Law and Order informs the public s vision But do age old symbols portrayals in the media and existing systems truly represent justice in all of its nuanced forms or do we need to think beyond these notions The second edition of Social Justice Theories Issues and Movements responds to the need for a comprehensive introduction to these issues Theories of social justice are presented in an accessible fashion to encourage engagement of students activists and scholars with these important lines of inquiry Issues are analyzed utilizing various theories for furthering engagement in possibilities Struggles for justice from legal cases to on the ground movements are presented for historical context and to inform the way forward

A History of Civilization in 50 Disasters Gale Eaton,2016-01-04 2016 IBPA Benjamin Franklin Silver Award Winner The earth shakes and cracks open Volcanoes erupt Continents freeze bake and flood Droughts parch the land Wildfires and hundred year storms consume anything in their paths Invisible clouds of disease and pestilence probe for victims Tidal waves sweep ashore from the vast sea The natural world is a dangerous place but one species has evolved a unique defense against the hazards civilization Civilization rearranges nature for human convenience Clothes and houses keep us warm agriculture feeds us medicine fights our diseases It all works most of the time But key resources lie in the most hazardous places so we choose to

live on river flood plains on the slopes of volcanoes at the edge of the sea above seismic faults We pack ourselves into cities Petri dishes for germs Civilization thrives on the edge of disaster And what happens when natural forces meet molasses holding tanks insecticides deepwater oil rigs nuclear power plants We learn the hard way how to avoid the last disaster and maybe how to create the next one What we don't know can indeed hurt us This book's white knuckled journey from antiquity to the present leads us to wonder at times how humankind has survived And yet as Author Gale Eaton makes clear civilization has advanced not just in spite of disasters but in part because of them Hats off to human resilience ingenuity and perseverance They've carried us this far may they continue to do so into our ever hazardous future The History in 50 series explores history by telling thematically linked stories Each book includes 50 illustrated narrative accounts of people and events some well known others often overlooked that together build a rich connect the dots mosaic and challenge conventional assumptions about how history unfolds Dedicated to the premise that history is the greatest story ever told Includes a mix of greatest hits with quirky surprising provocative accounts Challenges readers to think and engage Includes a glossary of technical terms sources by chapter teaching resources as jumping off points for student research and endnotes Fountas Pinnell Level Z *Subterranean Estuaries* Carlos Rocha, Henry Bokuniewicz, Clare Robinson, Isaac R.

Santos, Hannelore Waska, 2023-01-19 Over recent decades it has become widely recognized that water exchange between coastal aquifers and the ocean is an important component of the hydrologic cycle Twenty years have passed since Willard S Moore Moore 1999 introduced the term subterranean estuary STE to identify those zones within coastal aquifers where fresh groundwater mixes with surface saltwater Like open water estuaries STEs regulate the transfer of chemicals to the sea under the seashore by submarine groundwater discharge SGD This subterranean reactive node in the land ocean exchange pathway has a physical even if elusive structure created by a combination of temporally and spatially variable mass transfer across the groundwater ocean interface and dynamic flow processes Many case studies have shown that SGD is a key material link between coastal watersheds and the sea and indeed spatially resolved budgets of radioactive tracers in shelf waters suggest it is the dominant bulk water flux to coastal zones globally Clearly STE outflow as SGD is a large source of biogeochemically active solutes to shelf seas meaning that elemental budgets for these waters have to be revised in order to account for the new input But how Recognizing the global prevalence and potential environmental and societal impact of SGD numerous attempts to quantify chemical inputs into the ocean through this pathway have been published over the past 40 years However the role of the STE in modulating chemical fluxes to coastal waters has been generally oversimplified making a comprehensive analysis of cause and effect relationships between SGD inputs and ecosystem dynamics merely indicative Unfortunately we still lack a mechanistic understanding of the processes that control the interaction between allochthonous chemical delivery and autochthonous recycling in the STE that drive compositional variability of SGD flows Like that applied to open water estuaries a general practical and theoretical framework is needed one that captures the structure and

biogeochemistry of STEs and allows more accurate understanding of the chemical composition of SGD outflows while simultaneously providing for a typological basis that provides solid support for extrapolation of local SGD chemical flux measurements to regional and from these to global scale A comprehensive and critical review of the current state of the art would reveal that progress requires a improved variable density groundwater flow models that provide more accurate predictions and insights into the flow salt transport and mixing dynamics in STEs b quantitative understanding of the physicochemical and temporal drivers of saline groundwater seepage and composition and c better knowledge of the microbial ecology of STEs and links to marine freshwater and terrestrial drivers of STE dynamics Significant research effort has been devoted to addressing these knowledge gaps It is now time to provide a focused synopsis of these efforts We propose a combination of cutting edge original research systematic practice and policy reviews methods and hypothesis and theory articles tied together by a direction setting perspective analysis to generate a comprehensive and accurate scientific foundation supporting environmental managers scientists and other stakeholders to assess SGD feedbacks on coastal ecosystem functioning and resilience and implement successful coastal management policies

Halfway Home Reuben Jonathan Miller, 2021-02-02 A persuasive and essential Matthew Desmond work that will forever change how we look at life after prison in America through Miller s stunning and deeply painful reckoning with our nation s carceral system Heather Ann Thompson Each year more than half a million Americans are released from prison and join a population of twenty million people who live with a felony record Reuben Miller a chaplain at the Cook County Jail in Chicago and now a sociologist studying mass incarceration spent years alongside prisoners ex prisoners their friends and their families to understand the lifelong burden that even a single arrest can entail What his work revealed is a simple if overlooked truth life after incarceration is its own form of prison The idea that one can serve their debt and return to life as a full fledge member of society is one of America s most nefarious myths Recently released individuals are faced with jobs that are off limits apartments that cannot be occupied and votes that cannot be cast As The Color of Law exposed about our understanding of housing segregation Halfway Home shows that the American justice system was not created to rehabilitate Parole is structured to keep classes of Americans impoverished unstable and disenfranchised long after they ve paid their debt to society Informed by Miller s experience as the son and brother of incarcerated men captures the stories of the men women and communities fighting against a system that is designed for them to fail It is a poignant and eye opening call to arms that reveals how laws rules and regulations extract a tangible cost

not only from those working to rebuild their lives but also our democracy As Miller searchingly explores America must acknowledge and value the lives of its formerly imprisoned citizens PEN America 2022 John Kenneth Galbraith Award for Nonfiction Finalist Winner of the 2022 PROSE Award for Excellence in Social Sciences 2022 PROSE Awards Finalist 2022 PROSE Awards Category Winner for Cultural Anthropology and Sociology An NPR Selected 2021 Books We Love As heard on NPR s Fresh Air The Mining Journal, Railway and Commercial Gazette ,1891 Scientific American ,1898 **ERIC Educational Documents Index, 1966-69: Minor descriptors and author index** ,1970 *Directions* ,1979
