Matteson & McConnell's Gerontological Nursing Adrienne Dill Linton, Helen W. Lach, Mary Ann Matteson, 2007 *Matteson & McConnell's Gerontological Nursing* 3rd Edition provides comprehensive research-based information on nursing care of older adults. Beginning with the basics, the text uses a systems approach to describe the aging process from wellness to illness. It also describes physiological and psychological aspects of aging in detail, as well as assessment and practice in all settings using the nursing process. Each chapter incorporates a research and theory-based approach to the aging process. Content is comprehensive and focuses on caring for the older adult. The text examines the differences between normal aging conditions and clinical problems. Conditions, Competencies, and Roles in Gerontological Nursing section focuses on the process that nurses, especially clinical nurse specialists, use to impact gerontological nursing care. Nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice. Expanded content on functional assessment, including addressing communication issues, both verbal and non-verbal, alerts the reader to vital issues that may affect the patient's plan of care. Color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population. Reflections boxes, written by experts across different nursing fields, share personal experiences related to the chapter's content. Toward Better Health boxes provide key considerations for promoting healthy lifestyles. Assessment boxes emphasize specific physical tests and observations to make when assessing a patient. Age-Related Changes boxes detail the ways in which particular body systems are affected by the aging process. New

chapters on End of Life Care Evidence Based Practice and Assisted Living Care give the reader a more comprehensive look at gerontological nursing care The Epidemiology of Aging Anne Newman, Jane A. Cauley, 2012-12-12 The average age of the world's population is increasing at an unprecedented rate and this increase is changing the world This Silver tsunami emphasizes the need to provide advanced training in epidemiology and increase the cadre of experts in the study of aging This book is designed to summarize unique methodological issues relevant to the study of aging biomarkers of aging and the biology physiology of aging and in depth discussions of the etiology and epidemiology of common geriatric syndromes and diseases Contributing authors in the book represent many disciplines not only epidemiology and clinical geriatrics but also demography health services research cardiovascular disease diabetes psychiatry neurology social services musculoskeletal diseases and cancer The aim of the book is to provide a broad multidisciplinary background for any student researcher interested in aging The material in the book is organized and comprehensive It represents the most up to date information on the scientific issues in aging research written by academics who specialize in research and training in the broad field of aging The structure and organization of the book reflects our course series in the Epidemiology of Aging starting with the broad issues of demography and methodology and then addressing specific health conditions and geriatric conditions common to older persons **Facts and Research in Gerontology** ,1992
