Is the Matrix Gary D. Combs, 2021-04-12 Solved are two great mysteries science's search to understand the grand unified theory of everything and Christianity's search to understand the Lord's omnipresent nature both of which are the exact same thing only clothed in different terminology Thus making the Big Bang Theory and the Theory of Evolution both Biblical principles as first recorded in the Genesis account of creation written by Moses some 3 500 years ago **The Quick Fix**

Jesse Singal, 2021-04-06 An investigative journalist exposes the many holes in today's bestselling behavioral science and argues that the trendy TED Talk friendly psychological interventions that are so in vogue at the moment will never be enough to truly address social injustice and inequality With their viral TED talks bestselling books and counter intuitive remedies for complicated problems psychologists and other social scientists have become the reigning thinkers of our time Grit and power posing promised to help overcome entrenched inequalities in schools and the workplace the Army spent hundreds of millions of dollars on a positive psychology intervention geared at preventing PTSD in its combat soldiers and the implicit association test swept the nation on the strength of the claim that it can reveal unconscious biases and reduce racism in police departments and human resources departments But what if much of the science underlying these blockbuster ideas is dubious or fallacious What if Americans longstanding preference for simplistic self help platitudes is exerting a pernicious influence on the way behavioral science is communicated and even funded leading respected academics and the media astray In *The Quick Fix* Jesse Singal examines the most influential ideas of recent decades and the shaky science that supports them He begins with the California legislator who introduced self esteem into classrooms around the country in the 1980s and the Princeton political scientist who warned of an epidemic of youthful superpredators in the 1990s In both cases a much touted idea had little basis in reality but had a massive impact Turning toward the explosive popularity of 21st century social psychology Singal examines the misleading appeal of entertaining lab results and critiques the idea that subtle unconscious cues shape our behavior As he shows today's popular behavioral science emphasizes repairing improving and optimizing individuals rather than truly understanding and confronting the larger structural forces that drive social ills Like Anand Giridharadas's *Winners Take All* *The Quick Fix* is a fresh and powerful indictment of the thought leaders and influencers who cut corners as they sell the public half baked solutions to problems that deserve more serious treatment **River Flow**

2016 George Constantinescu, Marcelo Garcia, Dan Hanes, 2016-06-22 Understanding and being able to predict fluvial processes is one of the biggest challenges for hydraulics and environmental engineers hydrologists and other scientists interested in preserving and restoring the diverse functions of rivers The interactions among flow turbulence vegetation macroinvertebrates and other organisms as well as the transport and retention of particulate matter have important consequences on the ecological health of rivers Managing rivers in an ecologically friendly way is a major component of sustainable engineering design maintenance and restoration of ecological habitats To address these challenges a major focus of *River Flow 2016* was to highlight the latest advances in experimental computational and theoretical approaches that can

be used to deepen our understanding and capacity to predict flow and the associated fluid driven ecological processes anthropogenic influences sediment transport and morphodynamic processes River Flow 2016 was organized under the auspices of the Committee for Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR Since its first edition in 2002 the River Flow conference series has become the main international event focusing on river hydrodynamics sediment transport river engineering and restoration Some of the highlights of the 8th International Conference on Fluvial Hydraulics were to focus on inter disciplinary research involving among others ecological and biological aspects relevant to river flows and processes and to emphasize broader themes dealing with river sustainability River Flow 2016 extended abstract book 854 pages full paper CD ROM 2436 pages contains the contributions presented during the regular sessions covering the main conference themes and the special sessions focusing on specific hot topics of river flow research and will be of interest to academics interested in hydraulics hydrology and environmental engineering

Superminds Thomas W. Malone, 2018-05-15 From the founding director of the MIT Center for Collective Intelligence comes a fascinating look at the remarkable capacity for intelligence exhibited by groups of people and computers working together If you're like most people you probably believe that humans are the most intelligent animals on our planet But there's another kind of entity that can be far smarter groups of people In this groundbreaking book Thomas Malone the founding director of the MIT Center for Collective Intelligence shows how groups of people working together in superminds like hierarchies markets democracies and communities have been responsible for almost all human achievements

in business government science and beyond And these collectively intelligent human groups are about to get much smarter Using dozens of striking examples and case studies Malone shows how computers can help create more intelligent superminds simply by connecting humans to one another in a variety of rich new ways And although it will probably happen more gradually than many people expect artificially intelligent computers will amplify the power of these superminds by doing increasingly complex kinds of thinking Together these changes will have far reaching implications for everything from the way we buy groceries and plan business strategies to how we respond to climate change and even for democracy itself By understanding how these collectively intelligent groups work we can learn how to harness their genius to achieve our human goals Drawing on cutting edge science and insights from a remarkable range of disciplines Superminds articulates a bold and utterly fascinating picture of the future that will change the ways you work and live both with other people and with computers

Theorizing Teaching and Learning in Asia and Europe John Chi-Kin Lee, Kerry J. Kennedy, 2017-03-27 There has been much debate in recent times between the Anglo American tradition of curriculum studies and the Continental and North European tradition of didactics Didaktik As important as such debate has been this book seeks to add new voices to the debate representing ideas and traditions from a different part of the world The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions How does Chinese thinking about curriculum teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies This book deliberately transcends borders and cultures to explore new territory to provide a platform for open dialogue and to open up new areas of investigation Chapters include Curriculum Reform and Research in China A Social Historical Perspective What Mathematics Did Teachers Learn Comparison of the School and the Pre Service Teacher Mathematics Curricula in Germany and Taiwan Living in Parallel Worlds A Transatlantic Dialogue between General Didactics and Instructional Design

Nanotechnology for Oral Drug Delivery João Pedro Martins, Hélder A. Santos, 2020-07-30 Nanotechnology for Oral Drug Delivery From Concept to Applications discusses the current challenges of oral drug delivery broadly revising the different physicochemical barriers faced by nanotechnology based oral drug delivery systems and highlighting the challenges of improving intestinal permeability and drug absorption Oral delivery is the most widely used form of drug administration due to ease of ingestion cost effectiveness and versatility by allowing for the accommodation of different types of drugs having the highest patient compliance In this book a comprehensive overview of the most promising and up to date engineered and surface functionalized drug carrier systems as well as opportunities for the development of novel and robust delivery platforms for oral drug administration are discussed The relevance of controlling the physicochemical properties of the developed particle formulations from size and shape to drug release profile are broadly reviewed Advances in both in vitro and in vivo scenarios are discussed focusing on the possibilities to study the biological material interface The industrial

perspective on the production of nanotechnology based oral drug delivery systems is also covered Nanotechnology for Oral Drug Delivery From Concept to Applications is essential reading for researchers professors advanced students and industry professionals working in the development manufacturing and or commercialization of nanotechnology based systems for oral drug delivery targeted drug delivery controlled drug release materials science and biomaterials in vitro and in vivo testing of potential oral drug delivery technologies Highlights the relevance of oral drug delivery in the clinical setting Covers the most recent advances in the field of nanotechnology for oral drug delivery Provides the scientific community with data that can facilitate and guide their research

Transforming School Systems Through Assessment, Technology, and Non-Traditional Learning Methods Yünkül, Eyup,Güneş, Ahmet Melih,2024-08-26 In today s rapidly changing education landscape integrating assessment technology and non traditional learning methods is essential for fostering student success Data driven assessments allow educators to tailor their strategies to meet each student s unique needs while advanced technologies enhance accessibility and engagement Non traditional methods promote critical thinking and real world problem solving skills By implementing these innovative approaches education can be transformed for a more inclusive future for all students Transforming School Systems Through Assessment Technology and Non Traditional Learning Methods explores these pivotal changes providing a comprehensive understanding of how they are reshaping school systems globally This book gathers insights research and practical applications that highlight the transformative power of these elements in creating more effective inclusive and engaging learning environments Covering topics such as change management learning through play and teacher leadership this book is an excellent resource for educators school administrators researchers academicians policy makers education consultants technology developers edtech developers graduate students and preservice teachers

Renewable and Waste-Heat Utilisation Technologies Nareshkumar B. Handagama,Martin T. White,Paul Sapin,Christos N. Markides,2023-06-01 Understand the science and engineering behind conventional and renewable heat loss recovery techniques with this thorough reference Provides you with the knowledge and tools necessary to assess the potential waste heat recovery opportunities that exist within various industries and select the most suitable technology In particular technologies that convert waste heat into electricity cooling or high temperature heating are discussed in detail alongside more conventional technologies that directly or indirectly recirculate heat back into the production process Essential reading for professionals in chemical manufacturing mechanical and processing engineering who have an interest in energy conservation and waste heat recovery
