**Low Grade Heat Driven Multi-Effect Distillation and Desalination** Hui Tong Chua,Bijan Rahimi,2017-03-01 Low Grade Heat Driven Multi effect Distillation and Desalination describes the development of advanced multi effect evaporation technologies that are driven by low grade sensible heat including process waste heat in refineries heat rejection from diesel generators or microturbines and solar and geothermal energy The technologies discussed can be applied to desalination in remote areas purifying produced water in oil and gas industries and to re-concentrate process liquor in refineries This book is ideal for researchers engineering scientists graduate students and industrial practitioners working in the desalination petrochemical and mineral refining sectors helping

them further understand the technologies and opportunities that relate to their respective industries For researchers and graduate students the core enabling ideas in the book will provide insights and open up new horizons in thermal engineering Focuses on advanced yet practical distillation technologies using low grade sensible heat Explains the new design paradigm that must accompany the development of technologies Contains key experimental data that serves to prove the core concepts that underpin the new technologies Covers extensive thermo economic analyses of the technologies the price point for adoption capital cost comparison with existing technologies operating costs and net present values     *A Close Look at Close Reading* Barbara Moss,Diane Lapp,Maria Grant,Kelly Johnson,2015-05-21 The Common Core State Standards have put close reading in the spotlight as never before While middle and high school teachers want and need students to connect with analyze and learn from both literary and informational texts many are unsure how to foster the skills students must have in order to develop deep and nuanced understanding of complicated content Is there a process to follow How is close reading different from shared reading and other common literacy practices How do you prepare students to have their ability to analyze complex texts measured by high stakes assessments And how do you fit close reading instruction and experiences into an already crowded curriculum Literacy experts Barbara Moss Diane Lapp Maria Grant and Kelly Johnson answer these questions and more as they explain how to teach middle and high school students to be close readers how to make close reading a habit of practice across the content areas and why doing so will build content knowledge Informed by the authors extensive field experience and enriched by dozens of real life scenarios and downloadable tools and templates this book explores Text complexity and how to determine if a particular text is right for your learning purposes and your students The process and purpose of close reading with an emphasis on its role in developing the 21st century thinking speaking and writing skills essential for academic communication and college and career readiness How to plan teach and manage close reading sessions across the academic disciplines including the kinds of questions to ask texts to use and supports to provide How to assess close reading and help all students regardless of linguistic cultural or academic background connect deeply with what they read and derive meaning from complex texts Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers and empowered and independent learners In this comprehensive resource you ll find everything you need to start their journey     **Solar Silicon Processes** Bruno Ceccaroli,Eivind Ovrelid,Sergio Pizzini,2016-10-03 Polycrystalline silicon commonly called polysilicon is the material of choice for photovoltaic PV applications Polysilicon is the purest synthetic material on the market though its processing through gas purification and decomposition commonly called Siemens process carries high environmental risk While many current optoelectronic applications require high purity PV applications do not and therefore alternate processes and materials are being explored for PV grade silicon Solar Silicon Processes Technologies Challenges and Opportunities reviews current and potential future processing technologies for PV applications of solar silicon It describes alternative processes and

issues of material purity cost and environmental impact It covers limits of silicon use with respect to high efficiency solar cells and challenges arising from R D activities The book also defines purity requirements and purification processes of metallurgical grade silicon MG Si and examines production of solar grade silicon by novel processes directly from MG Si and or by decomposition of silane gas in a fluidized bed reactor FBR Furthermore the book Analyzes past research and industrial development of low cost silicon processes in view of understanding future trends in this field Discusses challenges and probability of success of various solar silicon processes Covers processes that are more environmentally sensitive Describes limits of silicon use with respect to high efficiency solar cells and challenges arising from R D activities Defines purity requirements and purification processes of MG Si Examines production of solar grade silicon directly from MG Si
