Future Information Engineering and Manufacturing Science Dawei Zheng, 2015-02-25 The 2014 International Conference on Future Information Engineering and Manufacturing Science FIEMS 2014 was held June 26 27 in Beijing China The objective of FIEMS 2014 was to provide a platform for researchers engineers academics as well as industry professionals from all over the world to present their research results and development acti

River Flow 2016 George Constantinescu, Marcelo Garcia, Dan Hanes, 2016-06-22 Understanding and being able to predict fluvial processes is one of the biggest challenges for hydraulics and environmental engineers hydrologists and other scientists interested in preserving and restoring the diverse functions of rivers The interactions among flow turbulence vegetation macroinvertebrates and other organisms as well as the transport and retention of particulate matter have important consequences on the ecological health of rivers Managing rivers in an ecologically friendly way is a major component of sustainable engineering design maintenance and restoration of ecological habitats To address these challenges a major focus of River Flow 2016 was to highlight the latest advances in experimental computational and theoretical approaches that can be used to deepen our understanding and capacity to predict flow and the associated fluid driven ecological processes anthropogenic influences sediment transport and morphodynamic processes River Flow 2016 was organized under the auspices of the Committee for Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR Since its first edition in 2002 the River Flow conference series has become the main international event focusing on river hydrodynamics sediment transport river engineering and restoration Some of the highlights of the 8th International Conference on Fluvial Hydraulics were to focus on inter disciplinary research involving among others ecological and biological aspects relevant to river flows and processes and to emphasize broader themes dealing with river sustainability River Flow 2016 extended abstract book 854 pages full paper CD ROM 2436 pages contains the contributions presented during the regular sessions covering the main conference themes and the special sessions focusing on specific hot topics of river flow research and will be of interest to academics interested in hydraulics hydrology and environmental engineering

Advances in Energy Science and Equipment Engineering II Volume 2 Shiquan Zhou, Aragona Patty, Shiming Chen, 2017-09-19 The 2016 2nd International Conference on Energy Equipment Science and Engineering ICEESE 2016 was held on November 12 14 2016 in Guangzhou China ICEESE 2016 brought together innovative academics and industrial experts in the field of energy equipment science and engineering to a common forum The primary goal of the conference is to promote research and developmental activities in energy equipment science and engineering and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world The conference will be held every year to make it an ideal platform for people to share views and experiences in energy equipment science and engineering and related areas This second volume of the two volume set of proceedings covers the

field of Structural and Materials Sciences and Computer Simulation Computer and Electrical Engineering Sustainable sanitation- how can we improve sanitation systems in the global south? Shikun Cheng,Devendra P. Saroj,Kangning Xu,Neelam Rana,Elisabeth Maria Huba-Mang,2023-06-14 **Logic and Critical Thinking in the Biomedical Sciences** Jules J. Berman,2020-07-03 Science is not a collection of facts Science is the process by which we draw inferences from facts Volume I of Logic and Critical Thinking in the Biomedical Sciences invites readers to linger over a collection of common observations to see what inferences can be drawn when one applies a bit of deductive logic If we just think about what we observe it is often possible to discover profound biomedical insights Volumes 1 and 2 of Logic and Critical Thinking in the Biomedical Sciences are written for biomedical scientists and college level students engaged in any of the life sciences including bioinformatics and related data sciences Provides a strong introduction to deductive methods that can be directly applied to the biomedical sciences Using hundreds of examples shows how creative scientists draw important inferences from observations that are often ignored by their peers Discusses complex biological and medical concepts in a relaxed manner intended to focus the reader s attention on the deductive process without dwelling excessively on details *Rare Metal Technology 2014* Neale R. Neelameggham,Shafiq Alam,Harald Oosterhof,Animesh Jha,Shijie Wang,2014-02-03 This collection presents the papers presented in the symposium on extraction of rare metals as well as rare extraction processing techniques used in metal production Paper topics include the extraction and processing of elements like antimony arsenic calcium chromium hafnium gold indium lithium molybdenum niobium rare earth metals rhenium scandium selenium silver strontium tantalum tellurium tin tungsten vanadium and zirconium Rare processing techniques presented include bio leaching molecular recognition technology recovery of valuable components of commodity metals such as magnesium from laterite process wastes titanium from ilmenites and rare metals from wastes such as phosphors and LCD monitors

Advances in Energy Science and Equipment Engineering II Volume 1 Shiquan Zhou,Aragona Patty,Shiming Chen,2017-09-19 The 2016 2nd International Conference on Energy Equipment Science and Engineering ICEESE 2016 will be held on November 12 14 2016 in Guangzhou China ICEESE 2016 is to bring together innovative academics and industrial experts in the field of energy equipment science and engineering to a common forum The primary goal of the conference is to promote research and developmental activities in energy equipment science and engineering and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world The conference will be held every year to make it an ideal platform for people to share views and experiences in energy equipment science and engineering and related areas **Metacognition in Learning** Nosisi Feza,2019-12-11 Metacognition skills have been proven to have a positive relationship with learning The strength of metacognition relies heavily on self efficacy where a student understands his her learning style and the ability to use information gathered and align it with his her learning style In addition knowing what you know and how you know it as a student plays a huge role in

knowing what you do not know and linking it with what is close or relevant to it that you know It is about having skills and knowledge that empowers you to be an independent learner Literature on classroom practices show a number of shortcomings in diverse areas such as poor teacher knowledge overcrowded classrooms and lack of resources for learning An independent student will strive under such an environment by studying independently searching for resources and finding multimodal ways of learning It is also important to note that naturally human beings are curious and want to learn in order to conquer their world Hence Piaget's work of intellectual autonomy cannot be ignored when exploring metacognition If learning experiences were ideal and developmental they would be no need to nurture metacognition Unfortunately the education systems remove students' curiosity by bringing fake environments into learning that impede creation and imagination This book emphasises the power of metacognition at different levels of learning It can be seen as a parallel intervention approach with expanded knowledge on how to extend existing skills for young children which is a pre intervention Authors in this book bring diverse viewpoints from diverse fields on how to nurture metacognition thus giving the reader an opportunity to borrow strategies from other fields This contribution is a mixture of empirical contributions and opinion pieces informed by review of literature

Behavioral Science & Policy: Volume 1, Issue 1 Craig Fox, Sim B. Sitkin, 2015-06-23 The success of nearly all public and private sector policies hinges on the behavior of individuals groups and organizations Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research However policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies The pages of this new journal will become a meeting ground a place where scientists and non scientists can

encounter clearly described behavioral research that can be put into action By design the scope of BSP is broad with topics spanning health care financial decisionmaking energy and the environment education and culture justice and ethics and work place practices Contributions will be made by researchers with expertise in psychology sociology law behavioral economics organization science decision science and marketing The first issue includes articles that challenge assumptions that many people have about behavioral policy interventions This includes the assumption that intuitions are a valid indication of policy effectiveness the assumption that large effects require large interventions the assumption that pre selecting defaults is more coercive than forcing citizens to make a choice and the assumption that the effectiveness of behavioral nudges requires that people not be informed about them The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution The mission of BSPA is to foster dialog between social scientists policymakers and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest BSPA does not advance a particular agenda or political perspective The first issue s contents follow
