Creative Music Making at Your Fingertips Gena R. Greher, Suzanne L.

Burton, 2021-02-02 Students are drawn to mobile technologies such as iPads and smartphones because of the sheer endless possibilities of the digital worlds they hold. But how can their potential for stimulating the imagination be effectively used in the music classroom to support students' development of musical thinking? Countering voices that see digital technologies as a threat to traditional forms of music making and music education, this collection explores the many ways in which hand-held devices can be used to promote student learning and provides teachers with guidance on making them a vital presence in their own classrooms. *Creative Music Making at Your Fingertips* features 11 chapters by music education scholars and practitioners that provide tried and true strategies for using mobile devices in a variety of contexts from general music education to ensembles and from K-12 to college classrooms. Drawing on their own experiences with bringing mobile devices and different music apps into the classroom, contributors show how these technologies can be turned into tools for teaching performance, improvisation, and composition. Their practical advice on how pedagogy and mobile technologies can be aligned to increase students' creative engagement with music and help them realize their musical potential makes this book an invaluable resource for music educators who want to be at the forefront of pedagogical transformations made possible by 21st-century technologies.

Delivering Distinctive Value in Emerging Economies

Thomas Anning-Dorson, Sheena Lovia Boateng, Richard Boateng, 2022-06-23 The idea behind editing this book is to present a contemporary reference that tells the story of how businesses and institutions in emerging economies are circumventing or can better circumvent institutional voids in order to create distinct value for consumers and develop resilient and sustainable economies. For this book, we gathered 24 contributions or chapters on new directions and strategies to create value in emerging economies. The contributions span thematic areas such as COVID-19 and small businesses, social influencers, and COVID-19 advocacy, artisan entrepreneurship, leadership, and project success, internationalization, and intellectual property, cultural artifacts in corporate branding, fintech adoption, mobile money, and agriculture, value chain, workplace fraud, ethical decision making in accountancy, modeling, early detection of mother's mode of delivery, assessment of health systems in Africa, online platforms, and patient empowerment. Students' academic engagement and technology and continuous use of e-learning among professional accountants and students. The authors of these contributions discuss the relevance of each chapter to its target audience: practitioners and students. They also outline the implications for practice and policy where applicable, alongside the concluding arguments of their respective chapters. In effect, the 24 chapters offer key strategic directions for businesses, public sector institutions, non-governmental organizations, and international development institutions to be more efficient and sustainably responsible in delivering distinctive value in emerging economies. Emerging economies have become an opportune interest of practitioners, entrepreneurs, and policy makers worldwide. Hence, a contemporary text which explores
