Introducción a la Informática Forense Francisco Lázaro Domínguez, 2013-01-29. Actualmente las tecnologías de la información constituyen un elemento indispensable para el funcionamiento de organizaciones y empresas de todo tipo. La ubicuidad de medios informáticos combinada con el crecimiento imparable de Internet y las redes durante los últimos años abre un escenario de oportunidades para actos ilícitos: fraude, espionaje empresarial, sabotaje, robo de

datos intrusiones no autorizadas en redes y sistemas y un largo etcétera a los que es preciso hacer frente entendiendo las mismas tecnologías de las que se sirven los delincuentes informáticos con el objeto de salirles al encuentro en el mismo campo de batalla. Parte vital en el combate contra el crimen es una investigación de medios digitales basada en métodos profesionales y buenas prácticas al efecto de que los elementos de evidencia obtenidos mediante la misma puedan ser puestos a disposición de los tribunales. Se debe hacer con las suficientes garantías en lo tocante al mantenimiento de la cadena de custodia y al cumplimiento de aspectos esenciales para el orden legal del estado de derecho como el respeto a las leyes sobre privacidad y protección de datos y otras normativas de relevancia similar. La Informática Forense es la disciplina que se encarga de la adquisición, análisis y valoración de elementos de evidencia digital hallados en ordenadores, soportes de datos e infraestructuras de red y que pudieran aportar luz en el esclarecimiento de actividades ilegales perpetradas en relación con instalaciones de proceso de datos independientemente de que dichas instalaciones sean el objetivo de la actividad criminal o medios utilizados para cometerla. El propósito de esta obra consiste en introducir al lector de manera resumida y clara en los principios, métodos, técnicas fundamentales y las implicaciones jurídicas de la investigación informática forense. A tal efecto se dará a conocer con sencillez y mediante un número de ejemplos cómo sacar partido a las soluciones tanto propietarias como de código libre utilizadas en la actualidad por los profesionales de la investigación forense. He aquí entre otros algunos de los temas tratados: Principios y metodología de la investigación de soportes de datos o Investigación forense de sistemas Microsoft Windows o Investigación forense de sistemas Linux Unix o Investigación forense de dispositivos móviles o Investigación en redes informáticas e Internet o Investigación de imágenes digitales o Herramientas de software y distribuciones Linux para la investigación forense.
