### **Routledge**

**Handbook of Media Geographies** Paul C Adams, Barney Warf, 2021-10-27 This Handbook offers a comprehensive overview

of media geography focusing on a range of different media viewed through the lenses of human geography and media theory. It addresses the spatial practices and processes associated with both old and new media considering media not just as technologies and infrastructures but also as networks systems and assemblages of things that come together to enable communication in the real world. With contributions from academics specializing in geography and media studies the Routledge Handbook of Media Geographies summarizes the recent developments in the field and explores key questions and challenges affecting various groups such as women minorities and persons with visual impairment. It considers geographical aspects of disruptive media uses such as hacking fake news and racism. Written in an approachable style chapters consider geographies of users norms rules laws values attitudes routines customs markets and power relations. They shed light on how mobile media make users vulnerable to tracking and surveillance but also facilitate innovative forms of mobility space perception and placemaking. Structured in four distinct sections centered around control and access to digital media mass media mobile media and surveillance and media and the politics of knowledge the Handbook explores digital divides and other manifestations of the uneven geographies of power. It also includes an overview of the alternative social media universe created by the Chinese government. Media geography is a burgeoning field of study that lies at the intersections of various social sciences including human geography political science sociology anthropology communication media studies urban studies and women and gender studies. Academics and students across these fields will greatly benefit from this Handbook.

*European Handbook of Crowdsourced Geographic Information* Cristina Capineri, Muki Haklay, Haosheng Huang, Vyron Antoniou, Juhani Kettunen, Frank Ostermann, Ross Purves, 2016-08-25 This book focuses on the study of the remarkable new source of geographic information that has become available in the form of user generated content accessible over the Internet through mobile and Web applications. The exploitation integration and application of these sources termed volunteered geographic information VGI or crowdsourced geographic information CGI offer scientists an unprecedented opportunity to conduct research on a variety of topics at multiple scales and for diversified objectives. The Handbook is organized in five parts addressing the fundamental questions: What motivates citizens to provide such information in the public domain and what factors govern predict its validity? What methods might be used to validate such information? Can VGI be framed within the larger domain of sensor networks in which inert and static sensors are replaced or combined by intelligent and mobile humans equipped with sensing devices? What limitations are imposed on VGI by differential access to broadband Internet mobile phones and other communication technologies and by

concerns over privacy How do VGI and crowdsourcing enable innovation applications to benefit human society Chapters examine how crowdsourcing techniques and methods and the VGI phenomenon have motivated a multidisciplinary research community to identify both fields of applications and quality criteria depending on the use of VGI Besides harvesting tools and storage of these data research has paid remarkable attention to these information resources in an age when information and participation is one of the most important drivers of development The collection opens questions and points to new research directions in addition to the findings that each of the authors demonstrates Despite rapid progress in VGI research this Handbook also shows that there are technical social political and methodological challenges that require further studies and research
