Communications and Multimedia Security Bart De Decker, Ingrid Schaumüller-Bichl, 2010-05-29 Over the last decade we have witnessed a growing dependency on information technology, resulting in a wide range of new opportunities. Clearly, it has become almost impossible to imagine life without a personal computer or laptop or without a cell phone. Social network sites (SNS) are competing with face-to-face encounters and may even oust them. Most SNS adepts have hundreds of friends happily sharing pictures and profiles and endless chitchat. We are on the threshold of the Internet of Things where every object will have its RFID tag. This will not only affect companies who will be able to optimize their production and delivery processes but also end users who will be able to enjoy many new applications ranging from smart shopping and smart fridges to geo-localized services. In the near future elderly people will be able to stay longer at home due to clever health monitoring systems. The sky seems to be the limit. However, we have also seen the other side of the coin: viruses, Trojan horses, breaches of privacy, identity theft, and other security threats. Our real and virtual worlds are becoming increasingly vulnerable to attack. In order to encourage security research by both academia and industry and to stimulate the dissemination of results, conferences need to be organized. With the 11th edition of the joint IFIP TC 6/TC 11 Conference on Communications and Multimedia Security (CMS 2010) the organizers resumed the tradition of previous CMS conferences after a three-year recess.

Davis, 2012-01-11 Marketing at the Olympics: the attraction and the rewards. Essential reading in preparation for the 2012 London Olympics, the newly revised and fully updated second edition of *The Olympic Games Effect* offers fascinating sports marketing and branding insights into the promotion of the Games themselves and their unique attraction for corporations in particular. The important lessons of past Olympics will be used to show a hundred-year-plus tradition based on a several thousand-year-old testament to the love of sports and competition, revealing how in recent years this has evolved into a seductively attractive vehicle for a wide range of audiences from consumers to corporations. Loaded with historical information on the Olympics, the book traces the history of the Olympics back to 776 BC. This legacy is vital to the ongoing success of the Olympics and is at the heart of why brands care so much. Packed with illustrations that illustrate how the

Games have become arguably the world's most successful sports event and the marketing opportunities this has led to includes relevant business strategies and recommendations to help companies understand how to make more effective sports sponsorship decisions. This timely new edition of *The Olympic Games Effect* shows the value contributed by sponsoring the world's premier sporting event and explains how by extension other global sports events have the potential to generate similarly impressive results for their sponsors.
