Defining and Assessing Lexical Proficiency Agnieszka Leńko-Szymańska, 2019-11-05 This comprehensive account of performance based assessment of L2 lexical proficiency analyzes and compares two of the primary methods of evaluation used in the field and unpacks the ways in which they tap into different dimensions of one model of lexical competence and proficiency This book builds on the latest research on performance based assessment which has most recently pointed to the application of more quantitative measures to L2 data to systematically explore the qualitative method of using human raters in assessment exercises and the quantitative method of using automatic computation of statistical measures of lexis and phraseology Supported by an up to date review of the existing literature both approaches unique features are highlighted but also compared to one another to provide a holistic overview of performance based assessment as it stands today at both the theoretical and empirical level These findings are exemplified in a concluding chapter which summarizes results from an empirical study looking at a range of lexical and phraseological features and human raters scores of over 150 essays written by both L2 learners of English and native speakers Taken together the volume challenges existing tendencies within the field which attempt to use one method to validate one another by demonstrating their capacity to indicate very different elements of lexical proficiency thereby offering a means by which to better conceptualize performance based assessment of L2 vocabulary in the future This book will be of interest to students and researchers working in second language acquisition and applied linguistics research particularly those interested in issues around assessment vocabulary acquisition and language proficiency The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a CC BY NC ND 4.0 license

Bourdieu, 1990 Pierre Bourdieu is one of the most protean intellectual forces in contemporary French thought. He holds the chair in sociology at the prestigious Collège de France yet his influence extends far beyond the area of sociological research and theory. Bourdieu's work presented in over twenty books lies on the borders of philosophy, anthropology, and ethnology and cultural theory. The present volume consists of diverse individual texts produced between 1980 and 1986 which take two forms: interviews in which Bourdieu confronts a series of probing and intelligent interviewers and conference papers that clarify and extend specific areas of his current research. Now that Bourdieu's work has achieved wide diffusion and celebrity, this is an appropriate time for this volume: a pause for retrospection and resynthesis for correction of misreadings and extension of previous insights and for projection of the next stages of his work. For this English edition, Bourdieu's celebrated inaugural lecture at the Collège de France, *Leçon sur la Leçon*, has been added. Because of the verve and clarity of Bourdieu's arguments in this book, it is a very readable and concise introduction to his work. *Cracking the Advanced Placement Spanish, 2004-2005* Princeton Review (Firm), 2004. Explaining Value and Other Essays in Moral Philosophy

Gilbert Harman, 2000. *Explaining Value* is a selection of the best of Gilbert Harman's shorter writings in moral philosophy. The thirteen essays originally published between 1967 and 1999 are divided into four sections which focus in turn on moral relativism, values and valuing, character traits and virtue ethics, and ways of explaining aspects of morality. An indication of the breadth of interest of the book can be given by mentioning a few of the compelling questions which Harman discusses: What accounts for the existence of basic moral disagreements? Why do most people think it is worse to injure someone than to fail to save them from injury? Why do many people think it is morally permissible to treat animals in ways we would not treat people? What is it to value something and what is it to value something intrinsically? How much of morality can or should be explained in terms of human flourishing or the possession of virtuous character traits? How do people come to be moral? Harman's distinctive approach to moral philosophy has provoked much interest; this volume offers a fascinating conspectus of his most important work in the area.
