Faraway Edmund Ironside, 2013-02-05 Earth Empire has developed incredible technology and it has taken humans half way across the galaxy Entire sentient species have been conquered their worlds and inhabitants exploited brutally Human technology and social structure has been used efficiently but not wisely A sense of malaise has gripped nearly all of the people and they yearn for something better Lost in a fog of bizarre state imposed controls supported by endless propaganda they don't know how to escape their meaningless existence They don't even know what they want At the outermost base called Faraway a small group of humans learn of some ancient writings although incomplete suggesting there is more to life Immersing themselves in the new way they start discovering thoughts like respect compassion community beauty purpose and especially love It's a tenuous beginning and there are those who will suppress the adherents of the new way A struggle begins between the two opposing ways The struggle spreads across the galaxy and even beyond from

Faraway Spaceports Around the World, A Global Growth Industry Erik Seedhouse,2016-12-31 This brief presents a concise description of the existing spaceport market the technologies being tested and developed at them and the private companies that are making them possible While NASA has its own plan for the future of space exploration one that includes a new shuttle an interplanetary spacecraft and astronauts going to Mars many people believe that the real future of space exploration is currently centered around dozens of commercial spaceports financed by entrepreneurs inspired not only by profit but by the dream of creating a new space age one not limited by bureaucracies or by budget allocations Commercial spaceports in Florida Texas Oklahoma Virginia and Alaska as well as in countries like Cura ao and Sweden are becoming home to dozens of private aerospace companies and provide a place where cutting edge technology can be developed tested and launched into space Based on original interviews with principles at the various companies involved and on site observations at the Mojave Air and Space Port the author traces the early days of the spaceport movement and outlines what lies ahead
