There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics Design and Construction Issues at Hazardous Waste Sites ,1991
