

AMA Citation Style Guide (10th ed.)

This guide is developed in line with American Medical Association. *AMA Manual of Style: A Guide for Authors and Editors*. 10th ed. London, UK: Oxford University Press; 2007.

General Principles of Formatting

AMA Manual of style is not very specific about formatting requirements, and most of the time students should follow the instructions of their professors. Following are the recommendations of style if none are provided by the instructor.

- Double-spacing
- Margins - 1" (2.54 cm)
- Any font type, 12 pt. AMA suggests two typefaces (a serif for body text and a sans serif for titles and subheads) with appropriate use of styles, such as bold and italics for a scholarly publication.
- Every page should be numbered starting with the title page. Page numbers are usually put in the upper left corner.

Papers written in AMA are required to have four sections:

- Title Page
- Abstract (structured or unstructured)
- Body (introduction, methods, results, discussion)
- References

Title Page

AMA style does not have strict rules about formatting the title page; however, it should include several crucial features:

- Title
- Authors' Name
- Degrees (above bachelors)
- E-mail Addresses
- Institutional Affiliation
- Word Count (for text only, excluding title, abstract, references, tables, and figures)

Remember that every instructor may have his or her preferences in organizing the title page.

Abstract

- Abstracts are written on a separate page.
- **The word "Abstract" is written in UPPER CASE, left justified, boldface, and has a triple-space afterward it.**
- The text on the abstract page is NOT indented.
- The sections of the abstract are single-spaced with double spaces between them.
- Structured abstracts are used for original data, systematic reviews, and clinical reviews; they are usually limited to 250-300 words.
- Unstructured abstracts are used for every other manuscript and are limited to 150 words.
- 3-10 keywords should be placed after the abstract.
