**Targeted Regulatory Writing Techniques: Clinical Documents for Drugs and Biologics** Linda Fossati

Wood,MaryAnn Foote,2009-01-05 This book describes the authors standard or best practices used in writing regulated clinical documents for the drug and biologics industry The fundamental premise of this book is that the end documents submitted to a health authority is dependent on the beginning the planning and strategy that go into organizing written documentation Each

regulatory document inherently exists within a constellation of related documents This book attempts to show the relationships between and among these documents and suggests strategies for organizing and writing these documents to maximize efficiency while developing clear and concise text At all times and irrespective of applicable laws and guidelines good communication skills and a sense of balance are essential to adequately accurately and clearly describe a product s characteristics At no time should the reader perceive these suggestions to be the only viable solution to writing regulatory documents nor should the reader expect that these suggestions guarantee product success The audience for this book is the novice medical writer or those who would like to explore or enhance regulatory writing skills We assume the reader will have a basic understanding of written communication but little experience in applying this skill to the task of regulatory writing Extensive knowledge of science clinical medicine mathematics or regulatory affairs law is not required to use the best practices described in this book
