

## Drivers Should Service for Severe Driving Conditions

***Rough & dusty roads, salt, snow driving, towing, extreme temperatures, climbing, added weight***

Every manufacturer outlines recommendations and service intervals for vehicles operating in "severe driving conditions" yet, not all dealership services departments follow the guidelines. In Truckee/Tahoe we drive severe conditions all year round. Just climbing 267 or Northwood Blvd is equal stress on an engine to towing a trailer. To keep your Subaru performing, follow the manufacture recommendations for "severe driving conditions" and trust a QAS service advisor to steer you in the direction that will keep your high-altitude vehicle safe from unnessisary troubles and repairs. .

### Avoid Troubles With Preventative Maintenance

**Transmission Fluid Flush**  
25,000 to 30,000 miles  
to avoid an expensive valve  
body replacement.

**Differential Fluids**  
Mountain driving is hard on  
the drivetrain. Avoid future  
problems with differentials  
by changing fluid every  
15,000 miles (per Subaru)

**Intake System Cleaning**  
To prevent carbon deposits  
causing potential engine and  
emission system damage.

**Cabin Air Filter**  
Yearly to breathe clean air.  
See side box.

**Battery Replacement**  
3-5 years depending on  
quality of battery & garage  
storage.

**Brake System Flush**  
Brake fluid traps moisture  
out for the air causing rust  
and damage to components  
in the system.

**AC System Inspection**  
Maintenance is cheaper  
than repairs and definately  
less than a new compressor  
or entire system.

### Lifetime Fluids? NO!

The term lifetime fluids is deceptive. Your Subaru may run for the extent of the manufacturer service contract or warranty without a transmission fluid change, but at what cost to the transmission? So you plan on buying new at the end of the warranty? Not exchanging the transmission fluid will lead to expensive troubles as the car ages. QAS mechanics are experts in "mountain maintenance" and suggest a flush and the transmission maintained. QAS can help stay on track.

### When Do I Need Brakes? 30,000 to 50,000 miles

Brake life depends on

- Roadway conditions
- Driving habits
- Quality of original brakes
- Downhill braking

Brakes on mountain driven cars wear differently due to road dirt, dust, moisture and extended braking. How long they last comes down to the quality of the brakes and the drivers braking habits.

### How to Protect Your Subaru Manufacturer Warranty

Dealerships will have you believe that they are the only ones who can service your car. Not true. The Right to Repair Act gives a qualified independent shop the right to work on your vehicle and not void the warranty.

### Buying Used

There is no question about it, if buying a used car, even from a dealership or lot, get a Pre-purchase inspection. What looks good on the outside, may not be good under the hood. You can use what you've learned to negotiate price. Save \$\$\$!!

### Dust, Smoke, Pollen & Rodents Feces in Your Face

It's no joke, Truckee has poor air quality. Dust, smoke, pollen and even rodent feces, clog filters and hinder them keeping the contaminants out. Filters need to be premium quality and changed more often.

### Take Your Subaru to 300K

A Subaru maintained with proper preventative maintenance at the right shop will have fewer troubles and can easily go 300,000 miles. Trust a QAS expert to steer you toward the maintenance that will protect your car.
