Most of the academic libraries create subject guides on their library web pages. These subject guides provide information and resources on either a specific topic or a specific course or on library services as a guide to users. Library guides may include text, print, or electronic materials. Some of these library guides provide information on databases available at the library, information on how to use and search these databases, links to library materials, and other help information such as Ask Us, FAQ entries, or important contact information. Library guides are well designed by professional librarians to help users start their research process and guide them to information sources they might not find themselves. This study was made to investigate the usage of academic subject guides in universities the United Arab Emirates.
