Novels for Children and Young Adults is the first book to offer a critical examination of children's and YA comics. The anthology is divided into five sections: structure and narration, transmedia, pedagogy, gender and sexuality, and identity, that reflect crucial issues and recurring topics in comics scholarship during the twenty-first century. The contributors are likewise drawn from a diverse array of disciplines: English, education, library science, and fine arts. Collectively, they analyze a variety of contemporary comics, including such highly popular series as *Diary of a Wimpy Kid* and *Lumberjanes*. Eisner award-winning graphic novels by Gene Luen Yang, Nate Powell, Mariko Tamaki, and Jillian Tamaki, as well as volumes frequently challenged for use in secondary classrooms such as Raina Telgemeier's *Drama* and Sherman Alexie's *The Absolutely True Diary of a Part Time Indian*. Introducing Teachers and Administrators to the NGSS Eric Brunzell, Deb M. Kneser, Kevin J.

Niemi, 2014-05-01 If you're charged with helping educators achieve the vision of the new science standards, this is the professional development resource you need. This book is chock full of activities and useful advice for guiding teachers and administrators as they put the standards into practice in the classroom. Written by three experts in professional development for science teachers, *Introducing Teachers and Administrators to the NGSS* introduces the vocabulary, structure, and conceptual shifts of the NGSS. It explores the three dimensions of the Framework: science and engineering practices, crosscutting concepts, and disciplinary core ideas, and how they're integrated in the NGSS. It provides classroom case studies of instructional approaches for students challenged by traditional science teaching. It covers curricular decisions involving course mapping, designing essential questions, and performance assessments, and using the NGSS to plan units of instruction. It examines the connections between the NGSS and the Common Core State Standards. It offers advice for getting past common professional development sticking points and finding further resources. Given the widespread changes in today's education landscape, teachers and administrators may feel overwhelmed by the prospect of putting the new standards into practice. If you're a science specialist, curriculum coordinator, or instructional coach who provides professional development, you will find this collection immensely helpful for heading off initiative fatigue, whether in an individual school or throughout a district.
