Lesson Summary

Limits to Cell Size

KEY QUESTION What are some of the difficulties a cell faces as it increases in size?

As a cell becomes larger, it is less efficient at moving nutrients into the cell and waste material out of the cell because the surface area does not grow as quickly as the volume. In addition, as a cell grows, it places increasing demands on its own DNA. Therefore, complex living things grow in size by producing more cells rather than by increasing cell size.
