**The Artisan Teaching Model for Instructional Leadership** Kenneth Baum, David Krulwich, 2016-08-24 The Artisan Teaching Model merges the idea of teamwork with the concept of an artisan apprentice relationship As in any apprenticeship newer members of the profession work alongside experts artisans As apprentices become more skilled they take on larger and more substantial roles and continue to work alongside and together with artisans Over time the apprentices become artisans themselves and in turn share the art and craft of teaching with newer teachers Although rubrics and checklists may cue good teaching practices they do not make great teachers or effective leaders Teaching is a craft and great teachers must be treated as the artisans they are It s the intensive collaboration among teachers that helps them develop the broad range of skills they need to become true artisans who know how to help every student achieve Baum and Krulwich work from this underlying premise and argue that all schools must develop conditions that allow true artisanship to flourish Baum and Krulwich s Artisan Teaching is a great example of the power of collaboration in schools and should be
