

Team Building Proposal

The role of team work in institutions has been identified as being critical. Good organizational performance can be attributed to the quality and nature of the team and the interaction amongst team members. It is therefore imperative that institutions are seen to function and perform their duties as effective and efficient as possible.

Team cohesion, synergy and a shared vision are a requirement for any institution to succeed. As a result the need to instill such is important. Team building activities have been identified as one sure way of enhancing effectiveness of a group/team whether a board, senior management or staff in an organization since institutions require teams whenever producing the desired outcome depends on integrating diverse skills, interests and efforts.

An effective team process releases, and then multiplies, the effectiveness of each member. The resulting synergy makes it possible to develop and implement better solutions, more acceptable solutions, and more successful solutions. People then become more than isolated individuals in the work environment. Several individuals working cooperatively together have greater potential to create success. Therefore, world – class organizations should make concerted efforts to develop high performing teams which gear towards organization's success in all its business fronts.

The consultants intend to impart, through experiential learning, current skills, attitudes, and knowledge in team dynamics to the participating employees. Most of the critical ingredients in a team-building program, such as Strategic Thinking, Interpersonal Skills, Leadership, Team Synergy, Team Cultures and Thriving in Change shall be explored.

TEAM BUILDING OBJECTIVES

Moss,Debra Moss Curtis,2012-11-01 In today s volatile law school environment curriculum reform has

emerged as a significant focus. It is commonly understood that law schools effectively teach certain analytical skills but are less successful in other areas and often scramble to adapt to evolving aims. This book demonstrates how law schools are successfully reforming their curriculum and lays the framework to show how all schools of law can engage in a continuous reform model that proactively shapes our profession. It is expected that faculty and professional staff engaged in legal education will utilize this book as a primary resource to guide their respective reform efforts. Each contributed chapter presents a case study of a data driven curriculum reform effort. The initial chapters set the conceptual context for the book while the final chapter offers summative recommendations for considering legal education reform as derived from the earlier case study chapters. This book adds significantly to the literature in legal education as we gain first hand insight into evidence based reform for the legal education community.
