Multi-Criteria Decision Analysis Igor Linkov, Emily Moberg, Benjamin D. Trump, Boris Yatsalo, Jeffrey M. Keisler, 2020-09-08 Decision analysis has become widely recognized as an important process for translating science into management actions With climate change and other systemic threats as driving forces in creating environmental and engineering problems there is a great need for understanding decision making frameworks through a case study based approach Management of environmental and engineering projects is often complicated and multidisciplinary in scope and nature thus issues that arise can be difficult to solve analytically Multi Criteria Decision Analysis Case Studies in Engineering and the Environment provides detailed description of MCDA methods and tools and illustrates their applications through case studies focused on sustainability and system engineering applications New in the Second Edition Addresses current and emerging environmental and engineering problems Includes seven new case studies to illustrate different management situations applicable at the international level Builds on real case studies from recent and relevant environmental and engineering management experience Describes advanced MCDA techniques and extensions used by practitioners Provides

corresponding decision models implemented using the DECERNS software package Gives a more holistic approach to teaching MCDA methodology with a focus on sustainable solutions and adoption of new technologies including nanotechnology and synthetic biology Given the novelty and inherent applicability of this decision making framework to the environmental and engineering fields a greater number of teaching tools for this topic need to be made available This book provides those teaching tools covering the breadth of the applications of MCDA methodologies with clear explanations of the MCDA process The case studies are implemented in the DECERNS software package allowing readers to experiment and explore and to understand the full process by which environmental managers assess these problems This book is a great resource for professionals and students seeking to learn decision analysis techniques and apply similar frameworks to environmental and engineering projects

School Peer Review for Educational Improvement and Accountability David Godfrey, 2020-09-03 This book explores how peer reviews are used in school improvement accountability and education system reform Importantly these issues are studied through numerous international cases and new empirical evidence This volume also identifies and describes barriers and facilitators to the development use sustainability and expansion of school peer review School peer reviews are a form of internal evaluation driven by schools themselves rather than externally imposed such as with school inspections Schools collaborate with other schools in networks collect data through self evaluation and in school review visits They provide feedback challenge and support to each other Despite the increased use of school peer review in system reform and school improvement very little research has been conducted on this model and there is a dearth of literature that looks at the phenomenon internationally This book fills this gap and will be an invaluable source for academics in school leadership and educational evaluation and accountability as well as those working at the level of executive leadership in school networks NGOs and in government policy making
