Research Advances in Network Technologies Anshul Verma, Pradeepika Verma, 2024-09-26 In the present technological age information is a valuable resource for both small and large enterprises as well as for our daily lives The key enablers that link computer resources and devices together to gather process and distribute crucial data both locally and worldwide are network technologies For our daily lives and commercial operations network technologies offer effective adaptable and seamless communication while maximizing productivity and resources Due to its significance this field has undergone a significant evolution in the past few decades moving away from traditional wired networks and toward Bluetooth infrared microwave radio and satellite networks These days network technologies are not employed only in computer labs businesses or homes a wide range of domains such as vehicular ad hoc networks mobile ad hoc networks and the Internet of Things have been seen using network technologies Researchers from academia and industry have worked hard to build and develop software based network technologies such as middleware protocol stacks and network software

architectures in addition to hardware based and physical network technologies The paradigm shift in this field is being driven primarily by software based network technologies which have also given rise to numerous new network innovations including grid computing cloud computing fog computing edge computing software defined networks and content centric networks Significant efforts have been made in cellular network technologies to boost the user experience and as a result new cellular network technologies including LTE VoLTE and 5G have also been developed Efforts continue to be made by researchers in these networking fields due to the demand for and importance of these technologies in present and future situations Many of these efforts are still in progress and there are still possibilities that need to be investigated As a result it is important to stay up to date on network technology developments and look into further research difficulties that need to be resolved for the benefit of users This book will present the most recent and leading research in the field of network technologies in order to achieve solutions for various problems that exist in this domain

Transforming Healthcare with the Internet of Things A.

Ugon, B. Séroussi, C. Lovis, 2016-04-12 The current trend in health and social care systems is a shift from care provision to citizen driven health Only a few years ago the high tech devices used in healthcare were limited to health cards and personal portable devices These have since evolved dramatically to include wearables sensors and devices for measuring health values The application of such technologies has for the most part been welcomed by both patients and professionals It is the fact that these devices can be connected to and communicate with other connected devices and systems which has been the game changer in healthcare technology not least because it has empowered and will empower patients to take more control of their own healthcare management This book presents the proceedings of the Special Topic Conference STC of the European Federation for Medical Informatics EFMI held in Paris France in April 2016 The special topic this year is Transforming Healthcare with the Internet of Things The papers are divided into four sections transforming healthcare with the Internet of things societal dimensions of the Internet of things ontology and decision support and clinical information systems and data reuse with a further section for poster presentations The book will be of interest to all those involved in the provision and delivery of technology based healthcare
