Policing the Amazon Vicente Riccio,Guilherme Lopes da Cunha,2024-11-18 This edited collection discusses the rule of

law in the Amazon and the capabilities of the region's sovereign states to police their territory considering security matters. Comprised of nine countries including a European Union member, the Amazon region features states facing political instability, poverty, social inequalities, high levels of corruption, and lack of trust by their populations. This context is aggravated by the presence of criminal organizations operating there and shaping transnational bonds. Notably, the world's foremost cocaine-producing countries, Colombia, Peru, and Bolivia, are located in the region, presenting related turmoil and instability. Moreover, as home to the largest rainforest on Earth and the widest biodiversity, the region is an object of concern due to environmental reasons. The protection of these natural resources, as well as the traditional peoples living there, is intertwined with issues of development, security, and policing. The book delves into questions on the international agenda such as how is it possible to sustain the rule of law in the Amazon. What are the states' capabilities for controlling the territory and enforcing the law? How do these states deal with the growing urban violence in the region? What are the capabilities of public authorities for proposing laws and policies and judicial systems to process, prevent, and suppress different crimes such as drug dealing, smuggling, human trafficking, terrorism, and environmental crimes? The book fills a gap in English language scholarship exploring the context of the rule of law in the Amazon and the impact on policing activities. It is ideal for a wide range of audiences including policing scholars, law enforcement, and community leaders and students focusing on criminal justice and the Amazon.
