Abstract

Publishing research paper across the Internet is getting easier comparing to 20 years ago. There are many open platform publishers such as ResearchGate, Academia.edu, IEEE Spectrum, etc. to choose from.

However, each publishers has its own research paper format. As for open platform publishers, there are none. Hence, there is a problem in choosing a most compatible format for paper write-up. This gives the main objective of this research: to find the closest and most compatible format for writing research paper.

To approach the problem, this paper reviewed the current research practices and the existing and available paper formats. Once the base data is available, analysis and unification process are done across each of the formats and approaches. Then, an unified format is consolidated and produced.

This paper also discussed the problem with all the formats and how it limits the unified format from reaching its objective and lastly concluded the use of the unified format.

1. Introduction

Publishing research paper across the Internet is getting easier with today's technologies and various platforms like ResearchGate, Academia.edu, IEEE Spectrum, etc. Anyone can publish his/her paper via the self-help portal.

However, apart from having academic paper writing discipline such as references and plagiarism checking, there is no single and global standard when it comes to research paper format and style. For conventional journalism paper submission path, many paper writing requires adherence to the publisher's chosen format; As for open platform however, there can be confusion.

Also, any writer would want to write a research paper compatible to as many publishers as it could while maintaining reader friendly. Therefore, the writer needs to know what are the available format and best practices before writing one.

In this paper, I reviewed the existing research paper writing format, current best practices, available options, existing samples, and existing rules. These practices were either adopt-and-modify or discards depending on its purpose until a unified, and purposeful format is found. Lastly, I then discuss the format with my peers for its feasibility and conclude the format as the new adoption.

2. The Problem

Before writing a paper, we always look into the best practices and publisher's writing requirements before proceeding to writing. In such case, we should never assume that a publisher's format is always compatible with another publisher. These were the 3 main causes that triggered this research.

2.1. Non-Unified Format

The first problem is that there is no unified research paper format to comply with. Some has stringent paper structure[5], some requires the use of passive voice[2], some has font and styling restriction[9], and some has publisher's specific format like Elsevier-Typeset[4] vs. the LaTeX format[5].

Hence, there is a need to find out a format that facilitates quick change or tweaks, allowing quick compatibility with different publishing platforms. This way, it allows researcher to focus on working with the actual tasks instead of working on meta work like this paper did.

2.2. Publishers Influences

Another problem is the publishers' direct influences to the paper format. Writer must perform a format query from the publisher before starting the write-up.
