server with SSL   **Sams Teach Yourself Web Services in 24 Hours** Mike Kopack,Stephen Potts,2003-05-02 According to recent press reports everyone is developing Web Services but many are still in the exploratory phase learning what s involved and how to achieve ROI This book is designed to give a working introduction to Web Services to help decision makers prepare for the implementation in their companies It demystifies the topic by providing a beginning level explanation of what this technology is what it means to businesses where to apply it and how to make it work Using numerous simple examples the book explains the core concepts of Web Services SOAP UDDI and WSDL as well as tools and related concepts that will help create the big picture in readers minds   *Sams Teach Yourself J2EE in 21 Days* Martin Bond,2002 Sams Teach Yourself J2EE in 21 Days introduces the Java 2 Enterprise Edition to Java programmers in 21 straightforward example driven lessons   Teach Yourself BEA WebLogic Server 7.0 in 21 Days Mandar Chitnis,Lakshmi Ananthamurthy,Pravin S. Tiwari,2002 Teaches developers to build J2EE applications using the leading J2EE application server in 21 straightforward example driven lessons   Covert Java Alex Kalinovsky,2004 As a Java developer you may find yourself in a situation where you have to maintain someone else s code or use a third party s library for your own application without documentation of the original source code Rather than spend hours feeling like you want to bang your head against the wall turn to Covert Java Techniques for Decompiling Patching and Reverse Engineering These techniques will show you how to better understand and work with third party applications Each chapter focuses on a technique to solve a specific problem such as obfuscation in code or scalability vulnerabilities outlining the issue and demonstrating possible solutions Summaries at the end of each chapter will help you double check that you understood the crucial points of each lesson You will also be able to download all code examples and sample applications for future reference from the publisher s website Let Covert Java help you crack open mysterious codes   *BEA WebLogic Workshop* Joe Weber,Mark Wutka,2003 BEA WebLogic Workshop is a rapid application development tool that makes building Java based Web service applications simple With just a basic foundation of Java programming you can use WebLogic Workshop to develop Web services BEA WebLogic Workshop Kick Start provides everything you need to get started with WebLogic Workshop including a quick Java primer and appendixes covering the essentials of XML SOAP and WSDL Learn the features of WebLogic Workshop and review hundreds of code examples and explore the inner workings of this new tool The book s CD ROM contains all the source code and examples from the book plus a 90 day trial version of BEA WebLogic Platform which includes WebLogic Workshop Foreword Web services have attracted much attention recently as the next big thing in computing technology Vendors of all shapes and sizes have announced their support for Web services technologies and every month a new Web services conference is popping up somewhere on the globe With all this hype and attention sometimes itAs difficult to really discover what Web services are where they fit in your company what the business case is and how you can actually get started taking advantage of this technology BEA has been working with customers to answer many of these questions and provide solutions that enable companies to easily construct

Web services that meet their needs today Contrary to the common conception of Web services as a consumer focused technology Web services may have the greatest potential as a technology inside enterprises as a new way of tying disparate applications together using standards based technologies To make Web services really work in the enterprise however itAs essential that they meet core enterprise requirements Web services applications have to exist in a constantly changing IT environment where different applications are built and modified by different people on different schedules They must accommodate everything from modern J2EE based applications to legacy systems to applications at business partners They must be able to handle rich and complex information and transmit it between internal and external applications They must easily interact with other applications to leverage existing investments They must be robust reliable and they must perform Perhaps most important of all they have to be easy to build For Web services to flourish within an organization all developers will need to be able to build Web services that meet these requirements BEA WebLogic Workshop Kick Start introduces you to BEAAs new WebLogic Workshop product a development tool and runtime framework that makes it easy to build powerful Web services that take advantage of the robust enterprise features of the WebLogic J2EE application server WebLogic Workshop provides a graphical tool that makes it easy to visualize develop and test Web service applications and visual controls that dramatically simplify access to existing resources like databases packaged applications Enterprise Java Beans and other Web services The Workshop framework provides out of the box support for building Web services that are loosely coupled so that the internal implementation details of an application can be cleanly separated from the public contract that a Web service offers to other applications This makes Workshop Web services flexible in the face of a constantly changing IT environment Workshop also provides built in support for asynchronous messaging so that Web service applications can carry on rich two way conversations with their clients and accommodate interaction with legacy systems and human users Finally Workshop supports easy manipulation of coarse grained messages so that rich documents can be handled without resorting to tedious XML DOM programming All of these capabilities can be accessed in a simple declarative fashion that enables all developers not just J2EE experts to get started building Web services today Even if you are new to the Java programming language or have never built a J2EE application before I think youAll be surprised how easy it is to get started with Workshop Working inside the WebLogic Workshop environment you can focus on the procedural business code that is important to getting your applications built and leave all of the details of Web service and J2EE plumbing to the application framework BEA WebLogic Workshop Kick Start will give you an introduction to Web services in general and teach you the few Java and J2EE concepts youAll need to know along the way Rich with examples this book illustrates the power of Web services and will help you realize the value they can bring to your company Carl Sjogreen Product Manager WebLogic Workshop BEA Systems Inc   MySQL and JSP Web Applications James Turner,2002 JSP developers encounter unique problems when building web applications that require intense database connectivity MySQL and JSP Web Applications addresses the challenges of

building data driven applications based on the JavaServer Pages development model MySQL and JSP Web Applications begins with an overview of the core technologies required for JSP database development JavaServer Pages JDBC and the database schema The book then outlines and presents an Internet commerce application that demonstrates concepts such as receiving and processing user input designing and implementing business rules and balancing the user load on the server Through the JDBC Java DataBase Connector the developer can communicate with most commercial databases such as Oracle The solutions presented in MySQL and JSP Web Applications center on the open source tools MySQL and Tomcat allowing the reader an affordable way to test applications and experiment with the book s examples **Sams Teach Yourself JavaServer Pages 2.0 with Apache Tomcat in 24 Hours** Mark Wutka,Alan Moffet,Kunal Mittal,2004 The Compact Framework brings familiar NET development to mobile devices This technology enables millions of Microsoft programmers to develop Windows CE applications Written by two Microsoft Compact Framework team members *The British National Bibliography* Arthur James Wells,2004 **Sams Teach Yourself JavaServer Pages in 24 Hours** Jose Annunziato,Stephanie Fesler Kaminaris,2000 SAMS Teach Yourself JSP in 24 Hours is the first level book on JSP It guarantees to teach in 24 one hour sessions JSP and its ties to other J2EE technologies including Servlets EJBs JDBC XML and the like It also covers the comprehensive development of JSP using such tools as BEA s Weblogic Server and Apache Tomcat **Sams Teach Yourself Java in 24 Hours (Covering Java 7 and Android)** Rogers Cadenhead,2011-10-21 Sams Teach Yourself Java in 24 Hours Sixth Edition Covering Java 7 and Android Development In just 24 lessons of one hour or less you can learn how to create Java applications Using a straightforward step by step approach popular author Rogers Cadenhead helps you master the skills and technology you need to create desktop and web programs web services and even an Android app in Java Full color figures and clear step by step instructions visually show you how to program with Java Quizzes and Exercises at the end of each chapter help you test your knowledge Notes Tips and Cautions provide related information advice and warnings Learn how to Set up your Java programming environment Write your first working program in just minutes Control program decisions and behavior Store and work with information Build straightforward user interfaces Create interactive web programs Use threading to build more responsive programs Read and write files and XML data Master best practices for object oriented programming Create flexible interoperable web services with JAX WS Use Java to create an Android app PART I Getting Started HOUR 1 Becoming a Programmer HOUR 2 Writing Your First Program HOUR 3 Vacationing in Java HOUR 4 Understanding How Java Programs Work PART II Learning the Basics of Programming HOUR 5 Storing and Changing Information in a Program HOUR 6 Using Strings to Communicate HOUR 7 Using Conditional Tests to Make Decisions HOUR 8 Repeating an Action with Loops PART III Working with Information in New Ways HOUR 9 Storing Information with Arrays HOUR 10 Creating Your First Object HOUR 11 Describing What Your Object Is Like HOUR 12 Making the Most of Existing Objects PART IV Programming a Graphical User Interface HOUR 13 Building a Simple User
