**Sense** Robin Maconie, 2002-05-07 In a visual culture hearing is the second sense and music is the art of hearing Kandinsky believed that music transcended painting and visual representation because it had the power to act directly and invisibly on the human spirit Because it is the only art to deal unequivocally with the real world of sound and its attendant perceptions of time motion and human mortality music remains a powerful and often controversial influence on human behavior Defining music in the broadest sense as any acoustic activity intended to influence the behavior of others and written in a clear conversational style for a non specialist readership The Second Sense draws on over 100 examples of recorded musical sources from throat singing to Beethoven and from traditional Japan to Boulez including a great many popular classics On the basis that Everything you hear is true true of yourself true of the music and true of the relationship between what you hear and how you hear it the author teases out the signs symbols and patterns of thought that arise from the way people hear the sounds people make and the instruments and environments that are designed and constructed to enhance the listening experience Maconie aims to do for music what Klee and Kandinsky did for art education and Marshall McLuhan for media studies Literature: Structure, Sound, and Sense Laurence Perrine, 1974 *Robert Frost and the Politics of Poetry* Tyler Hoffman, 2001 A powerful and persuasive new reading of Frost as a poet deeply engaged with both the literary and public politics of his day Sound and the Ancient Senses Shane Butler, Sarah Nooter, 2018-10-03 Sound leaves no ruins and no

residues even though it is experienced constantly It is ubiquitous but fleeting Even silence has sound even absence resonates Sound and the Ancient Senses aims to hear the lost sounds of antiquity from the sounds of the human body to those of the gods from the bathhouse to the Forum from the chirp of a cicada to the music of the spheres Sound plays so great a role in shaping our environments as to make it a crucial sounding board for thinking about space and ecology emotions and experience mortality and the divine orality and textuality and the self and its connection to others From antiquity to the present day poets and philosophers have strained to hear the ways that sounds structure our world and identities This volume looks at theories and practices of hearing and producing sounds in ritual contexts medicine mourning music poetry drama erotics philosophy rhetoric linguistics vocality and on the page and shows how ancient ideas of sound still shape how and what we hear today As the first comprehensive introduction to the soundscapes of antiquity this volume makes a significant contribution to the burgeoning fields of sound and voice studies and is the final volume of the series The Senses in Antiquity

**Geographies of Urban Sound** Torsten Wissmann, 2016-04-22 Traffic music language and nature help to create unique soundscapes that are essential to the place based character of each city Taking into account both the urban soundscape and the impacts of sound on the urban dweller this book examines sound not as a by product of urban life but as a fundamental part of the urban experience that is crucial to understanding the city's sense of place Illustrated by case studies from Europe and North America these range from on site measurements to the construction of audio tours for local tourism from media analysis of popular culture audio drama to sound identity and city branding and from the classification of noise in city planning to a consideration of the complex relationship between sacred sound and the creation of a sense of place Taking a social geographic perspective the book focuses on the effects of sounds on the individual and how they influence the ways s he engages the city as place especially in their daily routines In doing so it uncovers the socio scientific potential of sound in the urban environment based on the understanding that sound cannot and must not be seen as detached from the urban landscape but rather as a constituting element Sound exists not only within the city it is the city
