Sharing the Costs and Benefits of Energy and Resource Activity Lila Barrera-Hernández, Barry Barton, Lee Godden, Alastair Lucas, Anita Rønne, 2016-05-26 A new phase is emerging in the relationship between energy and resource activities and the communities that are affected by

them Any energy or resource project a mine a wind farm a dam for hydroelectricity or a shale gas development will involve a mix of impacts and benefits for communities For many years the law has mediated impacts on communities and provided for the distribution of financial benefits Now there is growing awareness of the need to consider not only a wider range of costs and benefits for communities from energy and resource projects but also the effects on communities at multiple scales and in complex ways Sharing the costs and benefits of natural resource activity has now become a legal requirement for energy and resource projects operating in many jurisdictions particularly in developing countries This book uses cases studies from across the globe to examine the emergence of such legal measures their advantages and disadvantages and the improvements that may be feasible in the legal frameworks used to distribute the costs and benefits of energy and resources activity The book has three parts Part I considers general legal and conceptual frameworks Part II addresses the mechanisms available to distribute costs and benefits and Part III considers the role of public engagement and participation in the sharing of the costs and benefits from energy and resource projects

Fight or Flight Martin Thomas, 2014-03-13 Although shattered by war in 1945 Britain and France still controlled the world's two largest colonial empires with imperial territories stretched over four continents And they appeared determined to keep them the roll call of British and French politicians soldiers settlers and writers who promised in word and print at this time to defend their colonial possessions at all costs is a long one Yet within twenty years both empires had almost completely disappeared The collapse was cataclysmic Peaceable transfers of power were eclipsed by episodes of territorial partition and mass violence whose bitter aftermath still lingers Hundreds of millions across four continents were caught up in the biggest reconfiguration of the international system ever seen In the meantime even the most dogged imperialists who had once stiffly defended imperial rule ultimately bent to the wind of change By the early 1950s Winston Churchill had retreated from his wartime pledge to keep Britain's Empire intact And General de Gaulle who quit the French presidency in 1946 complaining that France's new post war democracy would never hang on to the country's imperial prizes narrowly escaped assassination a generation later after negotiating the humiliating French withdrawal from Algeria Fight or Flight is the first ever comparative account of this dramatic collapse explaining the end of the British and French colonial empires as an intertwined even co dependent process Decolonization gathered momentum not as an empire specific affair but as a global one in which the wider march of twentieth century history played a vital part industrial concentration and global depression World War and Cold War Communism and other anti colonial ideologies mass consumerism and the allure of American popular culture Above all as Martin Thomas shows the internationalization of colonial affairs made it impossible to contain colonial problems locally spelling the end for Europe's two largest colonial empires in less than two decades from the end of the Second World War

The Transnational Politics of Higher Education Meng-Hsuan Chou, Isaac Kamola, Tamson Pietsch, 2016-02-26 This edited volume introduces readers to the relationship between higher education and transnational politics It shows how higher education is a significant arena for regional and international transformation as well as domestic political struggle replete with unequal power relations This volume shows The causes and impacts of recent transformations in higher education within a transnational context Emerging similarities in objectives institutional set ups and approaches taking place within higher education institutions across

different world regions The asymmetrical relations between various kinds of institutional commercial and state actors across borders The extent to which historical and colonial legacies are important in the transformation of higher education The potential effects these developments have on the current structure of international political order Drawing on case studies from across the Middle East Asia Africa Latin America and Europe the contributors develop diverse perspectives explaining the impact of transnational politics on higher education and higher education on transitional politics across time and locality This book is among the first multi disciplinary effort to wrestle with the question of how we can understand the political role of higher education and the political force universities exert in the realm of international relations
