SUBARU

SERVICE BULLETIN

APPLICABILITY: 1995-2000MY Legacy Vehicles
SUBJECT: Steering Knocking/Rattle Noise
When Turning

NUMBER: 04-09-01
DATE: 08/15/01

If you should encounter a knocking or rattle noise from the vehicle steering system please use the procedures below to diagnose and reduce or eliminate the noise. The noise is usually heard when turning and going over a bump in the road such as when turning into a driveway. Please keep in mind that while the noise sounds the same, the cause (and ultimately the repair performed) is different between 1995-99MY Legacy and 2000MY Legacy.

EXPLANATION OF MECHANISM AND CAUSE

The power steering assist is created using hydraulic pressure. This pressure is generated by the pump and then distributed through valving on the steering rack, to the appropriate side of the rack. There is always pressure on both sides of the rack, in order to provide quick steering reaction and a positive feel.
