something about it the guidance within will provide detailed blueprints to get you started in redesigning your life and relationships Best of all you can implement what you learn as you see fit according to your own goals value system and moral principles This book shows you how

All Data Are Local Yanni Alexander Loukissas,2019-04-30 How to analyze data settings rather than data sets acknowledging the meaning making power of the local In our data driven society it is too easy to assume the transparency of data Instead Yanni Loukissas argues in All Data Are Local we should approach data sets with an awareness that data are created by humans and their dutiful machines at a time in a place with the instruments at hand for audiences that are conditioned to receive them The term data set implies something discrete complete and portable but it is none of those things Examining a series of data sources important for understanding the state of public life in the United States Harvard s Arnold Arboretum the Digital Public Library of America UCLA s Television News Archive and the real estate marketplace Zillow Loukissas shows us how to analyze data settings rather than data sets Loukissas sets out six principles all data are local data have complex attachments to place data are collected from heterogeneous sources data and algorithms are inextricably entangled interfaces recontextualize data and data are indexes to local knowledge He then provides a set of practical guidelines to follow To make his argument Loukissas employs a combination of qualitative research on data cultures and exploratory data visualizations Rebutting the myth of digital universalism Loukissas reminds us of the meaning making power of the local

**Manual of Specialised Lexicography** Henning Bergenholtz,Sven Tarp,1995-01-01 From 1990 1994 the Danish Research Council for the Humanities granted a research project entitled translation of LSP texts which was initially split up into five part projects one of which has been concerned with LSP lexicography The Manual of Specialised Lexicography is one of the results of the research undertaken by this project The primary purpose of the Manual is to contribute towards an improved basis for practical specialised lexicography which has so far had but a small share in the explosive development that has taken place in general language lexicography since the early 1970s One implication of this is that only to a limited extent has it been possible to build upon existing findings The Manual thus has the twofold aim of offering guidance and direction to authors of specialised dictionaries as well as contributing towards the further development of lexicographical theories
