Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development

Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world economy It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia The author analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources

consumption was included in the global agenda and reached Brazil. It is clear in the work who and what the potential actors and instruments that interact for that purpose are. In a fun way, thematic infographics show the impact from consumption and production inspired by Life Cycle Assessment (LCA). In Chapters 2 and 3, readers will find inspiring examples of institutional procurement collected through exclusive interviews, news articles, corporate reports, and scientific articles describing successful experiences in the public and private sectors, highlighting which institutions broke the resistance and became protagonists in the use of transformation potential through sustainable consumption and production. In Chapter 4, under a guidance perspective, two tools are recommended for continuously improving management of public and business procurement: the former was developed by ICLEI for the Procura campaign and the latter by the UN Global Compact. Also, propositions are presented in order to incorporate sustainability attributes in the procurement and supply management systems. Based on our experiences with consultancies and projects in partnership with governments, business platforms, and academic researches, a survey was conducted with about 50 institutions among public bodies and businesses, organizing lessons learnt and calling attention for facilitators and barriers of institutional consumption aimed at sustainability. Among the institutions we surveyed, we picked up the examples described in this work. Finally, in Chapter 5, under an integrated perspective of sectors and actors, including individual consumers, we made a critical analysis of the advancements and challenges faced in the past years and point to guidelines for the future of the so wanted inclusive green economy, considering institutional procurement as an essential tool to rebuild a global scenario that is more favorable to sustainable development.
