identifies the principles that should be applied when processing Big Data in the context of food safety risk assessments Food safety is a critical goal in the protection of individuals right to health and the flourishing of the food and feed market Big Data is fostering new applications capable of enhancing the accuracy of food safety risk assessments An extraordinary amount of information is analysed to detect the existence or predict the likelihood of future risks also by means of machine learning algorithms Big Data and novel analysis techniques are topics of growing interest for food safety agencies including the

European Food Safety Authority EFSA This wealth of information brings with it both opportunities and risks concerning the extraction of meaningful inferences from data However conflicting interests and tensions among the parties involved are hindering efforts to find shared methods for steering the processing of Big Data in a sound transparent and trustworthy way While consumers call for more transparency food business operators tend to be reluctant to share informational assets This has resulted in a considerable lack of trust in the EU food safety system A recent legislative reform supported by new legal cases aims to restore confidence in the risk analysis system by reshaping the meaning of data ownership in this domain While this regulatory approach is being established breakthrough analytics techniques are encouraging thinking about the next steps in managing food safety data in the age of machine learning The book focuses on two core topics data ownership and data governance by evaluating how the regulatory framework addresses the challenges raised by Big Data and its analysis in an applied significant and overlooked domain To do so it adopts an interdisciplinary approach that considers both the technological advances and the policy tools adopted in the European Union while also assuming an ethical perspective when exploring potential solutions The conclusion puts forward a proposal an ethical blueprint for identifying the principles Security Accountability Fairness Explainability Transparency and Privacy to be observed when processing Big Data for food safety purposes including by means of machine learning Possible implementations are then discussed also in connection with two recent legislative proposals namely the Data Governance Act and the Artificial Intelligence Act [It's All Analytics, Part III](#) Scott Burk,Gary Miner,2023-09-15 Professionals are challenged each day by a changing landscape of technology and terminology In recent history especially the last 25 years there has been an explosion of terms and methods born that automate and improve decision making and operations One term called analytics is an overarching description of a compilation of methodologies But artificial intelligence AI statistics decision science and optimization which have been around for decades have resurged Also things like business intelligence online analytical processing OLAP and many many more have been born or reborn How is someone to make sense of all this methodology terminology Extending on the foundations introduced in the first book this book illustrates how professionals in healthcare business and government are applying these disciplines methods and technologies The goal of this book is to get leaders and practitioners to start thinking about how they may deploy techniques outside their function or industry into their domain Application of modern technology into new areas is one of the fastest most effective ways to improve results By providing a rich set of examples this book fosters creativity in the application and use of AI and analytics in innovative ways **Population Health Analytics** Martha L. Sylvia,Ines Maria Vigil,2021-08-02 As the focus of the health care delivery system continues to move toward a coordinated and accountable system there is an increasing need for a single resource that focuses on analytics for population health Population Health Analytics addresses that need by providing detailed information and a how to guide for achieving population health analytics Comprehensive current and practical this logically organized text builds from understanding data

sources to contextualizing data modeling data and glean insights from that data which is a natural progression for organizations in progressing to higher levels of analytic capabilities Furthermore these frameworks for the population health process and analytics are grounded in an evidence base that is also aligned with theories and processes used in healthcare disciplines This first of its kind text will prepare students to improve health outcomes understand patterns of health behavior and more

Green Sustainability: Towards Innovative Digital Transformation Dalia Magdi,Ahmed Abou El-Fetouh,Mohamed Mamdouh,Amit Joshi,2023-11-15 The book is a collection of best selected research papers presented at the Third World Conference on Internet of Things Applications Future ITAF 2023 organized by Global Knowledge Research Foundation in Cairo during February 4 5 2023 It includes innovative works from researchers leading innovators business executives and industry professionals to examine the latest advances and applications for commercial and industrial end users across sectors within the emerging Internet of things ecosphere It shares state of the art as well as emerging topics related to Internet of things such as big data research emerging services and analytics Internet of things IoT fundamentals electronic computation and analysis big data for multi discipline services security privacy and trust IoT technologies and open and cloud technologies
