Teachers Board Exam Result March 2013:

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Goel Chatterjee,2017-12-04 India's landmark Right of Children to Free and Compulsory Education Act 2009 guarantees education to all children aged 6-14 years. The Act mandates specific student-teacher ratios and emphasizes teacher quality. Writing this into legislation took seven years, but the seven years since has proven that ensuring effective teachers are recruited and placed in all schools in a time-bound manner is considerably more challenging. This report takes a detailed look at the complexity of the teacher management landscape in elementary and secondary schools in nine Indian states. On a daily basis, the administrative machinery of these states has to manage between 19,000 to nearly a million teachers in different types of schools and employment contracts and cope with recruiting thousands more and distributing them equitably across schools. This report examines the following issues: official requirements for becoming a schoolteacher in India; policies and processes for teacher recruitment, deployment and transfers; salaries and benefits of teachers; professional growth of teachers; and grievance redressal mechanisms for teachers. For the first time in India, this report compares and contrasts stated policy with actual practice in teacher management in the country using a combination of primary and secondary data. In so doing, the report reveals the hidden challenges and the nature of problems faced by administrators in attempting to build an effective teacher workforce which serves the needs of all of India's 200 million school children. The report examines states with varying characteristics, thus generating knowledge and evidence likely to be of interest to policy makers and practitioners in a wide range of contexts. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree **The Oxford**
