envisioned as an avenue towards socioeconomic mobility instead of being criticised as a platform opposing to liberal ideas In turn she provides insights into teaching younger age CFL learners in the global context in terms of the structuring of pedagogy and curriculum Wen Xu s research will be of interest to students and scholars in sociology of education student engagement pedagogy and curriculum CFL education and languages education as well as pre service teachers and practitioners who teach Chinese as a Foreign Language

**Rethinking the Asian Language Learning Paradigm in Australia** Kayoko Hashimoto,2024-11-21 This edited book calls for a rethink of the current Asian language learning paradigm that frames Asian languages as strategic and economic tools rather than an inherent part of Australian society As an increasing number of Australians have Asian ancestry and speak languages other than English at home it argues that we must reset the paradigm and understand Asian languages as intrinsically Australian to maximise existing linguistic and cultural assets The interdisciplinary chapters focusing on Japanese Chinese Korean and Vietnamese report on the state of Asian language learning and teaching in mainstream educational settings as well as

heritage language education in informal contexts in Australia With an additional chapter on implications for other Anglophone countries this volume urges a transformative approach to Asian language education in the context of current global migration and multilingual demographics in order to nurture global citizenship and honour linguistic diversity The book will be suitable for academics policy makers practitioners and teachers      *Teaching and Learning Culture* Mads Jakob Kirkebæk,Xiang-Yun Du,Annie Aarup Jensen,2013-11-19 This book is based on educational research conducted by researchers from the Department of Learning and Philosophy and the Confucius Institute for Innovation and Learning at Aalborg University Empirically it reports on different approaches to teaching and learning of culture including a student centered task based problem based learning PBL approach a digital technology supported approach and more It also reports on how when teaching and learning culture teachers professional identity and the informal teaching and learning environment impact the teaching and learning of culture in different educational settings from primary school to university A central theme in the book is the power of context The studies illustrate in multiple ways and from different angles that culture is not taught in a vacuum or learned in isolation but may be influenced by many factors both inside and outside the classroom at the same time culture also influences the context of the learning The context may be invisible and hide itself as tacit knowledge or embedded values or it may be very visible and present itself as a fixed curriculum or an established tradition No matter what forms and shapes the context takes the studies in this book strongly indicate that it is essential to be aware of the power of context in teaching and learning culture in order to understand it and negotiate it This book suggests that teachers should not try to limit or avoid contextual influences but instead should explore how the context may be integrated into and used constructively in the teaching and learning of culture This allowance of context in the classroom will allow for teachers students subjects and contexts to enter into a dialogue and negotiation of meaning that will enrich each other and achieve the established goal acquisition of cultural awareness and intercultural understanding      **Linguistic Entrepreneurship in Sino-African Student Mobility** Wen Xu,2024-05-04 This book explores African international students lived experience within Chinese higher education including their language ideologies investment in Chinese language learning and the re shaping of identities and aspirations Whilst high English proficiency has been sought by globally mobile students to play the class game and gain entrance to the circle of elites considerably less attention has been paid to how shifting global structures and China's semi peripheral position shape its language learners investment and identity construction Drawing upon a series of interviews the book deciphers African students logics of linguistic exchanges within the geopolitical and geo economic context of China African relations The students invested heavily into Chinese language learning and use while displaying perfectionism linguistic entrepreneurship and linguistic insecurity As the value of their Chinese linguistic capital increases they reassessed their sense of themselves and produced different social identities which includes the idea of the world is my oyster contributing to Africa's sustainable development and the disposition to tell

China's story well.
