Bell, Allison Rank, Carah Ong Whaley, 2024 This book comes at a crucial time as the USA and countries around the world wrestle with an ongoing period of democratic backsliding that shows little sign of abating Alarmingly study after study shows that younger people are not convinced that democracy will endure and that a sizable number are no longer convinced that it should Especially as changing educational and political landscapes make efforts to educate for democracy both more necessary and more fraught contributors to this book offer innovative pedagogies and praxis grounded in political and civic theories aimed at strengthening democratic norms practices and institutions *School-University-Community Collaboration for Civic Education and Engagement in the Democratic Project* R. Conner, 2020-02-18 Meet the new breed of student activists uncompromising focused and connected Activism is once again back on college campuses as students protest issues such as sexual assault climate change racial injustice and student debt It's perhaps unsurprising that the current political moment has triggered the rise of a new breed of student activist uncompromising focused and connected But many pundits have variously derided student activists as either snowflakes too fragile to encounter opinions that run contrary to their own or as social justice warriors who aggressively fight against those who transgress the ever changing bounds of political correctness The New Student Activists moves beyond these simple stereotypes and convenient caricatures to examine the nuanced motives and complex experiences of real life present day college student activists Jerusha O Conner offers insight into who these student activists are the causes they care about the strategies they deploy the factors that motivate and sustain them and the impact they have had on their campuses and beyond Conner dubs today's

student activists neoactivists who borrow from and build on the legacies of past generations of college student activists Exploring when how and why this diverse group of students turned to activism Conner examines the social and educational influences on their sociopolitical development She also reveals the fraught but mutually transformative relationship between institutions of higher education and student activists in the contemporary moment Written for anyone interested in better understanding the latest wave of student activism on campuses The New Student Activists raises fascinating implications for developmental theory and higher education policy and practice

Democracy at a Crossroads Gregory L. Samuels, Amy Samuels, 2019-06-01 At a time of questionable civility in American politics democratic education appears to be at a crossroads As we consider how to best explore democracy and foster a more civically engaged populace in the current socio political context it is critical to examine what frames our educational systems policies and practices and shapes our civic identity While teachers struggle with decreased instructional time for social studies and the demands of standardized tests the social sciences are often pushed to the margins Reflecting on how to negotiate local state national and global tensions related to policy and practice educators work to do what is best to equip

students to foster democratic citizenship and ideals Social sciences educators are uniquely positioned to embrace a journey that upholds democratic ideals of equality freedom and justice while simultaneously critiquing inequity and injustice in schools and our society The contributors to this volume situate a variety of discussions within the context of the crossroads and explore how to negotiate translate and reconceptualize our own beliefs and positionings in ways that positively influence and empower students teachers teacher educators and education policy makers Studies are presented related to civic education cross cultural interpretations emotional citizenship international economics and race consciousness as well as those that discuss how to challenge dominant narratives and negotiate educational policies and practices A Republic, If We Can Teach It Jeffrey Sikkenga, David Davenport, 2024-05-14 America faces a crisis in civic education that imperils the long term health of our country Too many Americans especially young people do not have the knowledge of our history and principles necessary to sustain our republic Recent national test results reveal the sad state of civic education in our schools The 2022 report of the National Assessment of Educational Progress showed that only 22 percent of eighth graders tested were proficient or better in their knowledge of civics and proficiency in US history dropped to an anemic 13 percent The Annenberg Policy Center reported in 2019 that only 39 percent of Americans could name the three branches of government while its 2017 study showed that 37 percent could not name a single right in the First Amendment How can we keep a republic as Benjamin Franklin put it if we don't know what a republic is At a deeper level the crisis is not simply about facts and information If the next generations of Americans do not come to understand that our history and principles are good and that they merit their affection our experiment in self government could fail Action is needed now to reverse the trend
