

Teaching Philosophy

~Mae Guerra, Experienced Educator

As I reflect upon my teaching career, it is evident that my philosophy in management systems has been greatly influenced by my mentors and colleagues. They have influenced my teaching philosophy because they have developed strong pedagogies with the knowledge to support it, they have set high academic standards for students and for themselves, they have respected intellectual diversity inside and outside the classroom, and they build trust among their students.

My management system philosophy is created from these ideas which are divided into six areas: (1) a positive learning environment, (2) clear expectations, standards and goals, (3) differentiated instruction through modification, (4) ongoing assessment, (5) self-improvement through lifelong learning, and (6) presenting a variety of learning materials to all students.

I believe in creating a positive learning environment in which respect for others is fundamental in promoting intellectual diversity. Respecting and promoting intellectual diversity requires a deeper understanding of how diversity manifests inside and outside of the classroom. Because students bring a diverse set of worldviews to the classroom, I believe that it is the teacher's responsibility to take neutral stances on controversial material, political issues, and general societal issues as well. I play the role of moderator and mentor instead of activist. Taking a neutral stance also acts to challenge students' intellectual abilities. Consequently, it presents students with a positive learning environment where they must use logic and reason to develop positions and counter positions.

I also believe that teachers should set specific and clear expectations, standards and goals from the very first day of the class. Once they are set, they should be adhered to throughout the remainder of the year. I believe setting high standards for students is an important way to get students to rise to their potential. Teachers should also set specific goals for students. Long term goals for students should be set early and should continue over time, allowing students to use what they are learning later in life.

Along with setting standards for students, I create standards for myself as well. One important standard that I have set for myself is giving students a clear indication on how they will be graded. Overall, setting clear standards helps limit grading bias and instances where students may try to take advantage of a teacher's generosity. Teachers should make an extra effort to present class materials in a variety of formats to aid in differentiated

Philosophy in Educational Research David Bridges, 2016-12-01 This book provides critical and reflective discussions of a wide range of issues arising in education at the interface between philosophy research policy and practice It addresses epistemological questions about the intellectual resources that underpin educational research explores the relationship between philosophy and educational research and examines debates about truth and truthfulness in educational research Furthermore it looks at issues to do with the relationship between research practice and policy and discusses questions about ethics and educational research Finally the book delves into the deeply contested area of research quality assessment The book is based on extensive engagement in empirically based educational research projects and in the institutional and professional management of research as well as in philosophical work It clarifies what is at stake in international debates around educational research and teases out the nature of the arguments and where argument permits the conclusions to which these point The book discusses these familiar themes using less predictable sources and points of reference such as codes of social obligation in contemporary Egypt and New Zealand the Soviet and the inspiration of the nineteenth century philosopher Abai in contemporary Kazakhstan seventeenth century France Pascal and the disputes between Jesuits and Jansenites eighteenth century Italy Giambattista Vico and la scienza nuova educational magic in traditional Ethiopia and ends at a banquet with Socrates and dinner with wine and a conversation loving Montaigne

International Research Handbook on Values Education and Student Wellbeing Terence Lovat, Ron Toomey, Neville Clement, 2010-08-05 Informed by the most up to date research from around the world as well as examples of good practice this handbook analyzes values education in the context of a range of school based measures associated with student wellbeing These include social emotional moral and spiritual growth elements that seem to be present where intellectual advancement and academic achievement are being maximized This text comes as values education widens in scope from being concerned with morality ethics civics and citizenship to a broader definition synonymous with a holistic approach to education in general This expanded purview is frequently described as pedagogy relating to values and wellbeing This contemporary understanding of values education or values and wellbeing pedagogy fits well with recent neuroscience research This has shown that notions of cognition or intellect are far more intertwined with social and emotional growth than earlier educational paradigms have allowed for In other words the best laid plans about the technical aspects of pedagogy are bound to fail unless the growth of the whole person social emotional moral spiritual and intellectual is the pedagogical target Teachers and educationalists will find that this handbook provides evidence culled from both research and practice of the beneficial effects of such a values and wellbeing pedagogy

Participatory Literacy Practices for P-12 Classrooms in the Digital Age Mitchell, Jessica S., Vaughn, Erin N., 2019-10-11 The ability to effectively communicate in a globalized world shapes the economic social and democratic implications for the future of P 12 students Digitally mediated communication in

an inclusive classroom increases a student's familiarity and comfortability with multiple types of media used in a wider technological culture. However, there is a need for research that explores the larger context and methodologies of participatory literacy in a digital educational space. *Participatory Literacy Practices for P-12 Classrooms in the Digital Age* is an essential collection of innovative research on the methods and applications of integrating digital content into a learning environment to support inclusive classroom designs. While highlighting topics such as game-based learning, coding education, and multimodal narratives, this book is ideally designed for practicing instructors, pre-service teachers, professional development coordinators, instructional facilitators, curriculum designers, academicians, and researchers seeking interdisciplinary coverage on how participatory literacies enhance a student's ability to both contribute to the class and engage in opportunities beyond the classroom. **Announcement for the Summer Session ...**, 1923 Language

Teacher Identity in TESOL Bedrettin Yazan, Kristen Lindahl, 2020-04-22 This volume draws on empirical evidence to explore the interplay between language teacher identity (LTI) and professional learning and instruction in the field of TESOL. In doing so, it makes a unique contribution to the field of language teacher education. By reconceptualizing teacher education, teaching, and ongoing teacher learning as a continuous context-bound process of identity work, *Language Teacher Identity in TESOL* discusses how teacher identity serves as a framework for classroom practice, professional and personal growth. Divided into five sections, the text explores key themes including narratives and writing, multimodal spaces, race, ethnicity, and language teacher emotions, and teacher educator/researcher practices. The 15 chapters offer insight into the experiences of preservice teachers, in-service teachers, and teacher educators in global TESOL contexts, including Canada, Japan, Korea, Norway, Sri Lanka, Turkey, the United Kingdom, and the United States. This text will be an ideal resource for researchers, academics, and scholars interested in furthering their knowledge of concepts grounding LTI, as well as teachers and teacher educators seeking to implement identity-oriented approaches in their own pedagogical practices. *University of Arizona Record*

University of Arizona, 1926 **The Bloomsbury Handbook of Global Education and Learning** Douglas Bourn, 2020-02-20 2021 PROSE Award Finalist Reference Works Learning about global issues and themes has become an increasingly recognised element of education in many countries around the world. Terms such as global learning, global citizenship, and global education can be seen within national education policies and international initiatives led by the UN, UNESCO, European Commission, and OECD. *The Bloomsbury Handbook of Global Education and Learning* brings together the main elements of the debates, provides analysis of policies, and suggests new directions for research in these areas. Written by internationally renowned scholars from Brazil, Canada, Finland, Germany, Ireland, Italy, Japan, Pakistan, Poland, South Africa, Spain, Sweden, Taiwan, UK, and the USA, the handbook offers a much-needed resource for academics, researchers, policy makers, and practitioners who need a clear picture of global learning. **ePortfolio Performance Support Systems** Katherine V.
