of this book is to not only persuade leaders that action research is leadership but that leadership can be more deliberate in promoting human dignity when leaders engage in a reflective process of continuous improvement. An action research frame of mind is the impetus for efforts toward continuous improvement. Dissatisfaction with what is the beginning of improvement. The caveat is that leadership is not a position; leadership is action. Those who want to make their work better, their service better, their clients, customers, stakeholders, children, or students better are leaders with or without a bureaucratic or hierarchical position. Professional leadership, executive leadership, company leadership, and everyday leadership requires action and reflection on those actions to determine the effectiveness of the continuous improvement process. The rationale for this book is to provide leaders at all levels with a framework that progresses through six steps of action and research from considering the challenge faced by the leader within an organization to reflecting on the improvement and next steps to continue the improvement process. Thus, Leading Up From Problem to Possibility.

Business Economics: Theory and Application Neil Harris, 2007-06-01 Business Economics Theory and Application is an undaunting and accessible text that focuses on the real world of business and how this relates to economics. The links to business are far more intrinsic than in other business economics textbooks where a business flavour is simply added to traditional economics theory. It provides an in depth jargon free analysis particularly relevant for one semester courses. A variety of case studies and questions are used throughout the text both to illustrate key points and for seminar and assignment work. Diagrams are included to aid the explanation of complex issues and review and discussion questions are incorporated to consolidate and expand on the learning. A lecturer's supplement accompanies the text.
