Small Towns and Decentralisation in India Rémi de Bercegol, 2016-09-29 This book examines the impact that decentralisation reforms initiated in the early 1990s have had on small towns in India It specifically focuses on small towns in Uttar Pradesh one of the most densely populated and poorest states in India Although considered home to one of the oldest urban civilisations India remains one of the least urbanised regions in the world At the same time the country has many million strong metropolises that are among the world s largest megacities as well as a multitude of small and medium sized towns and cities This paradoxical urbanisation against a backdrop of reforms has interested the scientific community to gain a more nuanced understanding of the changes and challenges involved This book analyses an urban environment often overlooked by researchers and public authorities namely that of small towns These towns are of vital importance as this is where the bulk of future urban development will take place However decades after implementation of the reforms the majority of reviews and assessments have focused on large cities and so the impacts of the reform on small towns are still poorly understood This book includes extensive primary data about political technical and financial municipal

issues in small towns of northern India and is therefore of interest to students researchers and planners working on urban and regional studies in the global South
