A Critical Analysis of National Apprenticeship Training Scheme (NATS) and Its Employability on Technical Graduates: A Case Study of the Eastern Region. DR. S.M. EJAZ AHMAD, 2024-12-17 Human resource development policies place a strong emphasis on training and skill improvement. The scale of India's present technical training infrastructure is less than what is needed. There is also a sizable skill gap between what the market requires in terms of skills and what graduate and diploma programs have to offer. Not only is it difficult to establish a significant quantitative expansion of skill training facilities but it is also difficult to improve their quality which is a work that is just as significant. The institutional level's capacity for educational and training programs is insufficient to meet the rising demand for the necessary skill sets, knowledge and experience. Apprenticeships have great promise in fostering our youths starting at the school level especially with several industries experiencing significant skills deficits in the future. The National Apprenticeship Training Scheme (NATS) in India which promotes learning by earning and learning by doing is a potent tool for skill development. Important changes have been made to The Apprentices Act 1961 to help freshly graduated students who are joining the workforce receive industrial training and exposure to contemporary industrial procedures. The BOAT Boards of Apprenticeship Training situated in Mumbai, Kanpur, Chennai and the BOPT Board of Practical Training headquartered in Kolkata are the four independent regional organizations through which the Ministry of Education (MoE) implements the program. Despite its significance and the crucial role that skill development plays in the economy it has been discovered that the topic has not recently been investigated. Therefore it was crucial to investigate the facts of the apprentices' job and training experiences and the business community's opinions regarding NATS and the subject matter of such a scheme. Additionally it will assist policymakers, academicians and industrialists in comprehending the gaps and choosing their future course of action. **A CRITICAL ANALYSIS OF THE NATIONAL APPRENTICESHIP TRAINING SCHEME (NATS) ON EMPLOYABILITY OF TECHNICAL GRADUATES: A CASE STUDY OF THE EASTERN REGION** has been published. The report includes data from numerous stakeholders as well. The main areas of focus for the investigation were skill and employability development, the role of industries in closing trainees' skill gaps, the level of awareness about NATS amongst the passing graduates and successful industry-institute collaboration through set schedules, targeted group discussions and spontaneous dialogues. Sen, 2016-03-23 This book examines the politics behind and the socio economic and ecological repercussions of the making of a new township variously called New Town Megacity or Jyoti Basu Nagar in Rajarhat near Kolkata Conceived by the West Bengal state government in the mid 1990s in pandering to the vision of urban planners of creating a hi tech town beyond an unruly crowded Kolkata and feeding the hunger of realtors and developers the city is built on the foundations of coercive even violent land acquisition state largesse and corruption and at the cost of erasing a self sufficient subsistence economy and despoiling a fragile environment Yet after its completion and departure of construction labour the new town appears as a necropolis a ghost city that belies its promised image of an urban utopia even as the displaced locals lead a precarious mobile existence as transit labour engaged in odd and informal jobs Written on the basis of intensive fieldwork government documents court records and chronicles of public protests this book broadly analyses the politics and economics of urbanisation in the age of post colonial capitalism particularly the paradoxical combination of neoliberal and primitive modes of capital accumulation upon which the global emergence of new towns is based Departing from the dominant styles of urban studies that focus on cultural or spatial analysis of cities the authors show the links between changes in space technology political economy class composition and forms of urban politics which give concrete shape to a city It will immensely interest those in sociology political science economics development studies urban studies

policy and governance studies and history Advancing Online Course Design and Pedagogy for the 21st Century Learning Environment Chatham, Daniel, 2021-01-08 The current learning environment is substantially different than what existed for most of the 20th century. Learners and teachers today must navigate in perpetually changing contexts where education is influenced by technological advancement and obsolescence, economic barriers, a changing employment landscape, and even international politics. Studies indicate that employers seek to hire graduates with strong skills in areas coalescing around international awareness, creativity, communication, leadership, and teamwork. Skills and experiences in these areas are necessary preparation for the current economy and to pursue jobs that do not exist yet while providing some insulation against the obsolescence of industries that lack these characteristics. These interpersonal skills are not often the subject of students' degrees, yet there are opportunities in online education to cultivate them. With increased interest in new career options comes the need to reconsider how to teach subjects in the increasingly online environment. Advancing Online Course Design and Pedagogy for the 21st Century Learning Environment is a critical reference book that navigates today's dynamic education requirements and provides examples of how online learning can foster growth in skill areas necessary for career advancement through effective course design. Moreover, it helps educators gain insight into online pedagogy and course design for the 21st-century learner and prepares them to convert traditional courses and enhance existing online courses, thereby supporting students' growth and development in the highly dynamic online learning environment. Focusing on specific learning activities, assessments, engagement, communication techniques, and more, this book provides a valuable resource for those seeking to upgrade teaching and learning into the online environment, those that seek better employment outcomes for their students, and those seeking to explore contemporary online course design strategies or examples. This includes teachers, instructional designers, curriculum developers, academicians, researchers, and students. **Digital Imagery and**

Contemporary Developments in High-Frequency Photonic Devices Bhattacharyya, Siddhartha, Debnath, Pampa, Deyasi, Arpan, Dey, Nilanjan, 2019-06-14 Microwave photonics and information optics provide high bandwidth and precision along with ultrafast speed at a low cost. In order to reduce noise at the communication transceivers, scattering in the devices needs to be decreased, which can be achieved by replacing optoelectronic devices with photonic devices because in the latter only photons propagate electromagnetic waves. *Contemporary Developments in High Frequency Photonic Devices* is a crucial

research book that examines high frequency photonics and their applications in communication engineering Featuring coverage on a wide range of topics such as metamaterials optoelectronic devices and plasmonics this book is excellent for students researchers engineers and professionals *Computer Information Systems - Analysis and Technologies* Nabendu Chaki,Agostino Cortesi,2011-12-10 This book constitutes the refereed proceedings of the 10th International Conference on Computer Information Systems CISIM 2011 held in Kolkata India in December 2011 The 30 revised full papers presented together with 6 keynote tasks and plenary lectures were carefully reviewed and selected from 67 submissions The papers are organized in topical sections on networking and its applications agent based systems biometric applications pattern recognition and image processing industrial applications algorithmic applications and data management information and network security *An Analysis of the Pali Canon and a Reference Table of Pali Literature* Russell Webb,Bhikkhu Nyanatusita,2011-12-01 An Analysis of the Pali Canon is a comprehensive overview of the contents of the works that make up the Tipitaka the Canon of the Theravada school of Buddhism It also contains an index of the suttas and sections of the Tipitaka as well as an extensive bibliography of the translations of canonical works and secondary literature The second part of this book A Reference Table of Pali Literature is an extensive list of all the works composed in the Indic language known as Pali It lists all the works of the Tipitaka the commentaries and subcommentaries historical chronicles works on medicine cosmology grammar law astrology Bible translations etc It also gives data on the authors time of composition country of origin and includes references to secondary literature that provide more information on the works listed This book is an essential resource for students and researchers of the Tipitaka and other Pali literature *Computational Intelligence in Digital Pedagogy* Arpan Deyasi,Soumen Mukherjee,Anirban Mukherjee,Arup Kumar Bhattacharjee,Arindam Mondal,2020-11-19 This book is a useful guide for the teaching fraternity administrators and education technology professionals to make good use of AI across outcome based technical education OBTE ecosystem and infuse innovations and affordable digital technologies to traditional pedagogic processes to make teaching learning more independent of human factor teacher student quality time and place and at the same time more impactful and enjoyable for the learners Providing access to the digital media and learning tools even to the extent of mobile apps to the students would allow them to keep pace with innovations in learning technologies learn according to their own pace and improve their understanding level and have instantaneous feedback and evaluation The book explores these new challenges and scope of using computational intelligence in educational technology The book also addresses how based on the data collected from the outcome of conventional educational system intelligent diagnostic and feedback system is developed which will change the teaching strategies and corresponding teaching learning process The book covers a wider framework of digital pedagogy and its intelligent applications on various sectors of education system *Advances in Computational Approaches in Biomechanics* Pain, Pritam,Banerjee, Sreerup,Bose, Goutam Kumar,2022-03-04 With the advent of digital computers and rapidly developing
