Question 3

A game console is a device that can be used to play video games.

Describe how a game console is used to play video games. List the input and output devices.

The quality of video communication will be assessed in your answer to this question.

Points may include:

- Game console has input devices, usually specialized controllers but also keyboards, microphones etc. similar to desktop computer
- Output is similar to desktop computer on a screen and speakers (sometimes using the same standards eg HDMI, DVI)
- Game console usually has an optical drive so that the software to be run can be installed. Many also have a hard disk drive which is the same as that used on a desktop computer

High Level Response (3-4 marks)

A detailed comparison of game consoles and desktop computers relating to input, output and storage devices. There will be some discussion of gaming, graphics and performance. Technical terms will be used appropriately and correctly.

Medium Level Response (2-3 marks)

A comparison of game consoles and desktop computers and game consoles with at least one comparison and one contrast. Technical terms will be used but not necessarily correctly. There will be some discussion of gaming, graphics and performance. Technical terms will be used correctly.

Low Level Response (1-2 marks)

There is an attempt to compare game consoles and desktop computers but most of the statements are incorrect or irrelevant. Information will be poorly organized and there will be little or no use of technical terms. There is no gaming, graphics and performance. Technical terms will be used incorrectly.

Response not worthy of credit (0 marks)
