**Analysis and Analyzers** Béla G. Lipták, Kriszta Venczel, 2016-11-25 The Instrument and Automation Engineers Handbook IAEH is the 1 process automation handbook in the world Volume two of the Fifth Edition Analysis and Analyzers describes the measurement of such analytical properties as composition Analysis and Analyzers is an invaluable resource that describes the availability features capabilities and selection of analyzers used for determining the quality and compositions of liquid gas and solid products in many processing industries It is the first time that a separate volume is devoted to analyzers in the IAEH This is because by converting the handbook into an international one the coverage of analyzers has almost doubled since the last edition Analysis and Analyzers Discusses the advantages and disadvantages of various process analyzer designs Offers application and method specific guidance for choosing the best analyzer Provides tables of analyzer capabilities and other practical information at a glance Contains detailed descriptions of domestic and overseas products their features capabilities and suppliers including suppliers web addresses Complete with 82 alphabetized chapters and a thorough index for quick access to specific information Analysis and Analyzers is a must have reference for instrument and automation engineers working in the chemical oil gas pharmaceutical pollution energy plastics paper wastewater food etc industries About the eBook The most important new feature of the IAEH Fifth Edition is its availability as an eBook The eBook provides the same content as the print edition with the addition of thousands of web addresses so that readers can reach suppliers or reference books and articles on the hundreds of topics covered in the handbook This feature includes a complete bidders list that allows readers to issue their specifications for competitive bids from any or all potential product suppliers
