Design of Functional Polymer Nanocomposites Rotimi Sadiku,Oluranti Agboola,Kokkarachedu Varaprasad,Mapula Lucey Mavhungu,2025-07-01 Design of Functional Polymer Nanocomposites Interface and Interphase Reactions Compatibilization and Bond Behavior and Functionalization Procedures reviews the latest developments in this fast moving research field The book discusses interface and interphase interactions in polymer nanocomposites as well as compatibilization behavior and different functionalization procedures It illustrates how each of these essential tools can be used in the design of new polymer nanocomposites for a broad range of different industrial scale applications In the research and development of polymer nanocomposites the interface and interphase reactions of different constituents is extremely important They play a vital role in introducing additional features and in the final resultant properties of the nanocomposite In addition final properties are also dependent upon the bond behavior and the reaction and interface created between the two constituents Covers interface and interphase reactions Discusses compatibilization behavior and different functionalization procedures as essential design tools Presents preparation strategies such as polycondensation copolymerization and free radical chains polymerization Provides a diverse focus on a wide range of high performance applications

Analysis and Design of Hybrid Energy Storage Systems Jorge Garcia,2020-04-17 The most important environmental challenge today s society is facing is to reduce the effects of CO2 emissions and global warming Such an ambitious challenge can only be achieved through a holistic approach capable of tackling the problem from a multidisciplinary point of view One of the core technologies called to play a critical role in this approach is the use of energy storage systems These systems enable among other things the balancing of the stochastic behavior of Renewable Sources and Distributed Generation in modern Energy Systems the efficient supply of industrial and consumer loads the development of efficient and clean transport and the development of Nearly Zero Energy Buildings nZEB and intelligent cities Hybrid

Energy Storage Systems HESS consist of two or more storage devices with complementary key characteristics that are able to behave jointly with better performance than any of the technologies considered individually Recent developments in storage device technologies interface systems control and monitoring techniques or visualization and information technologies have driven the implementation of HESS in many industrial commercial and domestic applications This Special Issue focuses on the analysis design and implementation of hybrid energy storage systems across a broad spectrum encompassing different storage technologies including electrochemical capacitive mechanical or mechanical storage devices engineering branches power electronics and control strategies energy engineering energy engineering chemistry modelling simulation and emulation techniques data analysis and algorithms social and economic analysis intelligent and Internet of Things IoT systems and so on applications energy systems renewable energy generation industrial applications transportation Uninterruptible Power Supplies UPS and critical load supply etc and evaluation and performance size and weight benefits efficiency and power loss economic analysis environmental costs etc

The Future of Innovation Anna Trifilova, 2017-05-15 Three unassailable facts will strike you as soon as you start to read *The Future of Innovation* One innovation is the new mantra whether you re involved in teaching art and design new product development for a blue chip consumer brand or responsible for providing public services to citizens Two understanding innovation requires multiple perspectives from culture and mindset social and commercial context new ways of working as much as new products or services Three innovation is a journey drawing on insights from around the globe is essential to accelerate our progress Bettina von Stamm and Anna Trifilova have gathered together the thoughts and ideas of over 200 of the most creative innovators from business professional practice and academia from nearly 60 countries The contributors look at innovation from almost every angle Their statements offer an unparalleled view of innovation and provide a depth of insight that is extraordinary The editors reflection on each statement and on the sections within the book provide useful links between themes and reinforce the relationships between many of the ideas Anyone interested in innovation student researcher or practitioner will benefit from this global thought collection The contributors multiple perspectives models practical examples and stories provide a sense of innovation that no single writer could ever capture *The Future of Innovation* is supported by the website www.thefutureofinnovation.org where you can find even more contributions and tools that enable you to exchange expand elaborate and develop your perspectives on the future of innovation

Social Influences on Information and Communication Technology Innovations Tatnall, Arthur, 2012-05-31 It has been over twenty years since developments in actor network theory were first written on paper Since then the Information and Communication Technologies ICT community has begun to discover the power of using actor network theory as an explanatory framework for much of its research This research community has come to an understanding that information systems are of necessity socio technical in nature and require a socio technical approach to their investigation Thanks to developments in actor network theory

researchers can now approach people and technology as one single entity that gives support to social influences on technological innovations Social Influences on Information and Communication Technology Innovations discusses in great detail the use of actor network theory in offering explanations for socio technical phenomena focusing greatly on information communication technologies Implementation and use of information and communication technologies inevitably involves the interactions of both technology and people This publication facilitates international growth in the body of research investigating the value of using actor network theory as a means of understanding socio technical phenomena and technological innovation

The Future of Newspapers Bob Franklin, 2013-09-13 The future of newspapers is hotly contested Pessimistic pundits predict their imminent demise while others envisage a new era of participatory journalism online with yet others advocating increased investment in quality journalism rather than free gifts and DVDs as the necessary cure for the current parlous state of newspapers Globally newspapers confront highly variable prospects reflecting their location in different market sectors countries and journalism cultures But despite this diversity they face similar challenges in responding to the increased competition from expansive radio and 24 hour television news channels the emergence of free Metro papers the delivery of news services on billboards pod casts and mobile telephony the development of online editions as well as the burgeoning of blogs citizen journalists and User Generated Content Newspapers revenue streams are also under attack as advertising increasingly migrates online This authoritative collection of research based essays by distinguished scholars and journalists from around the globe brings together a judicious mix of academic expertise and professional journalistic experience to analyse and report on the future of newspapers This book was published as special issues of Journalism Practice and Journalism Studies

A Proposal for the Expanded Fruition of Cultural Heritage Sites Carla Ferreyra, 2025-05-06 This book presents a comprehensive methodology integrating analysis digitization and the preservation of cultural heritage It investigates three potential UNESCO World Heritage Sites in Italy Germany and South Africa and employs a blend of documentary research and advanced digital surveying and data processing techniques The volume shows how these efforts yielded actionable strategies to meet society's evolving demands for surveying recovery and conservation The book documents the work behind the overarching objective which was to digitize analyze categorize and store all collected data within a BIM framework with the aim of streamlining collaboration enhancing management efficiency and optimizing processes It demonstrates the utilization of digital tools in not only amplifying traditional scientific technological approaches to heritage protection but also its role in reshaping the perception comprehension and communication of heritage This fosters the development of more sustainable conservation strategies
