Tollison, 1992-06-15 Intercollegiate sports is an enterprise that annually grosses over 1 billion in income Some schools may receive more than 20 million from athletic programs perhaps as much as 10 million simply from the sale of football tickets Drawing on nontechnical economic data the authors present a persuasive case that the premier sports organization of colleges and universities in the United States the NCAA is a cartel its members engaged in classically defined restrictive practices for the sole purpose of jointly maximizing their profits This fresh perspective on the NCAA offers explanations of why illicit payments to athletes persist why non NCAA organizations have not flourished and why members have readily agreed on certain suspect rules Tracing the historical development of this institutional behavior the authors argue that the major football powers in the early 1950s were able to gain control of the internal processes of NCAA enforcement Over time as other schools teams improved and began to win on the playing field the more powerful institutions applied pressure to bring the newcomers under NCAA investigation and ultimately to place them on probation By carefully managing NCAA enforcement regulations major schools blunted the threat to their continued growth presented by other teams Offering a valuable case study for sports analysts and students of economics and cartel behavior this book is a revealing glimpse inside the embattled NCAA Most Likely to Succeed Tony Wagner, Ted Dintersmith, 2015 From two leading experts in education and entrepreneurship an urgent call for the radical reimagining of American education so that we better equip students for the realities of the twenty first century economy Today more than ever we prize academic achievement pressuring our children to get into the right colleges have the highest GPAs and pursue advanced degrees But while students may graduate with credentials by and large they lack the competencies needed to be thoughtful engaged citizens and to get good jobs in our rapidly evolving economy Our school system was engineered a century ago to produce a work force for a world that no longer exists Alarming our methods of schooling crush the creativity and initiative young people need to thrive in the twenty first century In Most Likely to Succeed bestselling author and education expert Tony Wagner and venture capitalist Ted Dintersmith call for a complete overhaul of the function and focus of American schools sharing insights and stories from the front lines including profiles of successful students teachers parents and business leaders Most Likely to Succeed presents a new vision of American education one that puts wonder creativity and initiative at the very heart of the learning process and prepares students for today s economy This

The Breakthrough Years Ellen Galinsky, 2024-03-26 Blending cutting edge research with engaging storytelling The Breakthrough Years offers readers a paradigm shifting comprehensive understanding of adolescence Just wait until they're a teenager Many parents of newborns have heard this

warning about the stressful phase that's to come. But what if it doesn't have to be that way? Child development expert Ellen Galinsky challenges widely held assumptions about adolescents and offers new ways for parents and others to better understand and interact with them in a way that helps them thrive. By combining the latest research on cognitive neuroscience with an unprecedented and extensive set of studies of young people nine through nineteen and their families, Galinsky reveals among other things that adolescents don't want to separate completely from their parents but seek a different type of relationship that they want to be helpers rather than be helped and that social media can become a positive influence for teens. Galinsky's Shared Solutions framework and Possibilities Mindset show you how to turn daily conflicts into opportunities for problem solving where both teens and parents feel listened to and respected, how to encourage positive risk taking in your child like standing up for themselves, making new friends and helping their communities, and how to promote five essential executive function based skills that can help them succeed now and in the future. *The Breakthrough Years* recasts adolescence as a time of possibility for teens and adults offering breakthrough opportunities for connection.
